This volume provides materials for active learning about peacebuilding and conflict management in the context of complex stability operations. Today, America faces security challenges unlike any it has faced before, many of which requiring lengthy U.S. involvement in stability operations. These challenges are exceedingly dynamic and complex because of the ever changing mix and number of actors involved, the pace with which the strategic and operational environments change, and the constraints placed on response options. This volume presents a series of case studies to inspire active learning about peacebuilding and conflict management in the context of complex stability operations. The case studies highlight dilemmas pertaining to the story of the case (case dilemma) and to its larger policy implications (policy dilemma). The cases stimulate readers to "get inside the heads" of case protagonists with widely differing cultural backgrounds, professional experiences, and individual and organisational interests. Overall, *Understanding Complex Military Operations* challenges the reader to recognize the importance of specific national security related issues and their inherent dilemmas, deduce policy implications, and discern lessons that might apply to other – perhaps even non-security related – areas of public policy, administration, and management. This volume will be of much interest to students of conflict prevention, transitional justice, peacebuilding, security studies and professionals conducting field-based operations in potentially hazardous environments. Virtual and augmented reality raise significant questions for law and policy. When should virtual world activities or augmented reality images count as protected First Amendment 'speech', and when are they instead a nuisance or trespass? When does copying them infringe intellectual property laws? When should a person (or computer) face legal consequences for allegedly harmful virtual acts? The *Research Handbook on the Law of Virtual and Augmented Reality* addresses these questions and others, drawing upon free speech doctrine, criminal law, issues of data protection and privacy, legal rights for increasingly intelligent avatars, and issues of jurisdiction within virtual and augmented reality worlds. The book also addresses key substantive topics in international law, with reference to important contemporary foreign policy issues, such as (i) international human rights, (ii) the law of the sea, (iii) international environmental law, (iv) the use of force and the law of armed conflict, and (v) international criminal law. Key Features: New co-author Duncan Hollis of Temple Law School joins Stanford Law School's Allen Weiner as the active authors of the book. New discussions of major international developments, including the law governing the use of force [e.g., cyber operations and the military campaign against the Islamic State (ISIS)], nonproliferation (e.g., the Iranian and North Korean nuclear crises), the law of the sea (e.g., disputed maritime claims in the South China Sea), and international environmental law (e.g., the conclusion of the Paris Agreement). New case study in Chapter 1 focused on the international response to the rise of ISIS. Inclusion of extended excerpts from a number of major recent Supreme Court decisions related to international law, including *Bond v. United States* (on fundamental principles of federalism and the treaty power under Article VI of the Constitution), *Zivotofsky v. Kerry* (on the separation of powers between Congress and the President in the field of foreign affairs), and *Kiobel v. Royal Dutch Petroleum Co.* (on the Alien Tort Statute). Adopts a modern, conceptual approach to the presentation of materials on statehood (including Palestinian claims to statehood), international organizations, and international dispute resolution. Environmental law principles, such as the polluter pays, the precautionary principle or the common but differentiated responsibilities, have had a very important function in the shaping and evolution of the young sector of environmental law which has developed over the last fifty years. Yet, their status, content, binding force and functions in law remain largely uncertain. Forming a key part of the *Elgar Encyclopedia of Environmental Law*, this book examines the facets of environmental principles in international, national and regional law, as applied in different parts of the world and by a variety of courts. It assembles more than fifty contributions from all continents which clarify that, as the environment itself has no voice and

cannot express its concerns, there is an overriding importance of scholars' active discussion of environmental principles. The book demonstrates that the necessity to preserve this planet requires a continuous, democratic discussion of values, objectives and concepts which are expressed in the numerous and continuously evolving environmental principles. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. This book offers criminologists and students an evidence-based discussion of the latest trends in corrections. Over the last several decades, research has clearly shown that rehabilitation efforts can be effective at reducing recidivism among criminal offenders. However, researchers also recognize that treatment is not a "one size fits all" approach. Offenders vary by gender, age, crime type, and/or addictions, to name but a few, and these individual needs must be addressed by providers. Finally, issues such as leadership, quality of staff, and evaluation efforts affect the quality and delivery of treatment services. This book synthesizes the vast research for the student interested in correctional rehabilitation as well as for the practitioner working with offenders. While other texts have addressed issues regarding treatment in corrections, this text is unique in that it not only discusses the research on "what works" but also addresses implementation issues as practitioners move from theory to practice, as well as the importance of staff, leadership and evaluation efforts. Comprehensive and authoritative, yet reader-friendly, Clarkson/Miller/Cross' BUSINESS LAW: TEXT AND CASES, 15E blends classic black letter law with cutting-edge coverage of contemporary issues and cases. This market-leading book offers a strong reader focus designed to make the law accessible, interesting, and relevant. Updated content and features highlight today's latest developments in business law, while cases range from precedent-setting landmarks to some of today's most important recent decisions. The authors prioritize ethics with a unique ethical decision-making framework. This edition also integrates global, e-commerce, digital, and corporate themes with insightful features, such as Digital Updates that demonstrate how digital progress is affecting the law. "Scott Greer has done a remarkable job in explaining how the Europeanization of health policy takes place, how institutional legacies exert an influence in lobbying, how harmonization exacerbates path-dependent welfare structures that in turn impede a 'race to the bottom', and why the idea of a European social model creates positive external effects, even if it is only an ad hoc policy construction." Journal of European Social Policy 2010 20 (2) "Provides an original and thought-provoking perspective and approach, combining in-depth theoretical discussions and well-researched case studies over 11 chapters..The book is well written and insightful, and the main argument is that EU law and policy developments - directly and indirectly - have the potential of undermining domestic health systems and the political actors within them."Journal of Common Market Studies, 2010 Volume 48. Number 3 "This book provides a unique insight into what is going on, unnoticed by most, 'below the surface' in EU health policy. It serves as a wake-up call for those who continue to believe that the EU is of marginal interest and relevance in national level debates about the direction of health care. In addition, in an engaging and lively style, it provides essential guidance for students of health policy who seek to understand the labyrinthine processes and the wide ranging unintended consequences - for good and for bad - of EU policy making." Professor Naomi Chambers, Head of Health Policy and Management, Manchester Business School "In this insightful book, Scott Greer describes how European health policy has long been developed in a secret garden, where a small number of people find pragmatic solutions to immediate problems while avoiding the fundamental questions ... Yet the logic of European integration is tearing down the garden's walls, creating a public park where pragmatism takes second place to principles. Something must be done, but it is not clear what. Greer's book will be essential reading ... for anyone who is responsible for organising how health care is delivered in Europe." Martin McKee CBE, London School of Hygiene and Tropical Medicine, UK This important new book explains how European Union (EU) developed policies shape and constrain health services. It answers the key questions asked of EU health policy: What is it? Why did it happen? What does it take to influence it and how can it be changed? Using extensive new data, Greer discusses how EU policy is influenced by lobbies in Brussels and by four big member states: France, Germany, Spain and the United Kingdom. Shaping EU health policy takes information, coordination, nimbleness and focus. The book examines the ways that the successful health lobbies and member states work, identifies weaknesses, and emphasizes the challenge to health policymakers: if they do not influence EU health policies, they will lose influence over their own health systems. The Politics of European Union Health Policies will be of great interest to students and academics of EU policy and politics, as well as health policy makers. "Walshe and Smith have assembled an invaluable introduction to healthcare management and health systems. With their fellow authors, they provide a comprehensive review of a range of issues related to the funding and provision of care, and how services are organised and managed. Now in its third edition, **Healthcare Management** has been updated and revised to meet the needs of teachers and students alike." Professor Chris Ham, Chief Executive, The King's Fund, UK "This book covers the main areas of knowledge which managers need, and gives tools for thinking and empirical examples relevant to current challenges. Evidence based management might not always be possible, but this book gives a way for a manager to become research-informed and therefore more effective. This third edition of the book is even more relevant internationally and improved to help readers apply the ideas to their situation." Professor John Øvretveit, Director of Research, LIME/MMC, The Karolinska Institute, Sweden "No-one learns to be a manager in a classroom or from a book, but books that take this disclaimer as their starting point are indispensable. Walshe and Smith (and their fellow authors) invite their audience (healthcare managers, healthcare policy makers and postgraduate students, taking courses in healthcare management) to critically combine experiential learning with academic learning and to acquire knowledge from both practice and theory. By doing so, they have found the third way between the advocates of evidence-based management and their critics."
