Private investigator Quin St. James plies her trade in Miami, in the 1980s. She thinks she's seen it all until her lover's murder uncovers disturbing secrets about who he was. She teams up with police detective Mike McCleary, who's pursuing a female serial killer who picks up her victims in singles bars. To find the killer, they must pierce their own perceptual blind spots, their dark fields. Social networks have emerged as a major trend in computing and social paradigms in the past few years. The social network model helps to inform the study of community behavior, allowing qualitative and quantitative assessments of how people communicate and the rules that govern communication. Social Networking and Community Behavior Modeling: Qualitative and Quantitative Measures provides a clear and consolidated view of current social network models. This work explores new methods for modeling, characterizing, and constructing social networks. Chapters contained in this book study critical security issues confronting social networking, the emergence of new mobile social networking devices and applications, network robustness, and how social networks impact the business aspects of organizations. "When does a life bend towards freed? grasp its direction" asks Adrienne Rich in Dark Fields of the Republic, her major new work. Her explorations go to the heart of democracy and love, and the historical and present endangerment of both. A theater of

voices of men and women, the dead and the living, over time and across continents, the poems of Dark Fields of the Republic take conversations, imaginary and real, actions taken for better or worse, out of histories and songs to extend the poet's reach of witness and power of connection--and then invites the reader to participate. Survivor of a school shooting three decades earlier, Geoff Conover becomes the only person with whom a present-day murderer will speak and confesses a devastating secret about a legendary monster who terrifies the children of a small Ohio community. Madeline Dare isn't your average detective and drawn by the desire to clear her cousin's name, she uncovers a startling web of intrigue and family secrets that could prove even more deadly. Born into a blue-blood family, she followed her heart to marry ruggedly handsome Dean, a farmboy-genius investor who's as far from high society as humanly possible. Now Maddie's stuck in the post-industrial wasteland of Syracuse, New York, while her husband spends weeks on the road perfecting the railway equipment innovation that might be their only chance to escape. She can handle churning out lightweight features for the local paper--it's the Dean-less nights in their dingy, WASP-castoff-crammed apartment that Maddie can't stomach. Obsession trumps angst when a set of long-buried dog tags link her favorite cousin to the scene of a vicious double homicide. DARKNESS RECLAIMED is a collection of ten wonderfully dark stories spanning the best of the horror genre. Body horror, psychological horror, thriller, dark fantasy and tech horror. Each bite-sized page-turning story will have you checking over your shoulder and sleeping with the lights on. Supernatural and paranormal encounters. Deranged families and brutal murders. An insatiable itch and a train ride from hell ... Delve into the madness within these pages and let them crawl inside your mind. Featuring Authors: Judith Field, David Feuling, Grant Hinton, Joel R. Hunt, Kimberly Rei, Michelle River, J.M. Smith, K.T. Tate, Mark Towse, Tor-Anders Ulven This book is a printed edition of the Special Issue "Phase-Contrast and Dark-Field Imaging" that was published in J. Imaging Darien and the others have returned, continuing their adventures across Gaianterra, the war-torn land filled with wonder and magic. What new perils await our characters, heroes, and villains alike? What memories of the past have been long forgotten by the people of the world? And what possible dangers could those memories of yore have upon the world of today? The Imperial War is heating up, and forces from all sides are more active now than ever before. Who will strike next, and where will their swords clash? Can the emperor of Lumin'Valeria be stopped before he attacks and crushes the other nations of the world? Darien and his companions are headed for the Temple Shendau, which is high up on Mount Gai Den. Once there, will they find the answers about the mysterious dark sword that Darien now carries? A powerful sword that gives the wielder magic, but at a horrible cost. They search for answers with a sense of urgency, knowing that something dangerous is behind the black sword. Yet as they search for answers, the Bladeknights, elite commandos of Lumin'Valeria, are searching for them. Lord Dragos, the one who's seemingly pulling all the strings, is searching for something, but what and why? This superpowered warrior-mage has the might of the Empire at his beck and call--what else does such a man desire? Sampson Rockfell is still in pursuit of traitors and villains from the Empire. Can he finally put a stop to their dark designs, and will he get revenge upon the one who betrayed his kingdom of Nepheir? Finally, what will happen first? Will Jack

Destin, the Vampire Hunter, give up his quest to find the impossible, or will he run into his worst nightmares? Could vampires possibly exist? And if so, what dangers do they present? "We live as we dream – alone. While the dream disappears, the life continues painfully." Heart of Darkness follows seaman Charles Marlow as he recounts his eventful journey up the Congo River and into Congo, located in Central Africa. During the course of Marlow's travels, he encounters various setbacks, interacts with the locals, and develops a growing fascination with the enigmatic figure of Mr. Kurtz, an ivory trader who seems to exert a mysterious charm over the natives. This book is a tale of imperialism, racism, and contradiction and explores what it really means to call oneself 'civilized'. This book explores the concepts of possible unified field theory, vehicles that can travel at the speed of light or faster, photon absorption, and alternative green energy. Theological discourse in the West has consistently valued the word over the image. Aesthetics, which discerns the criteria and value of the beautiful and what "pleases the senses," is the discipline that prioritizes sensual intelligence over the rational; this book advocates a reconsideration of the doctrine of the incarnation through an aesthetics of vulnerability, in which the ethical optics of attention to the vulnerable other becomes the standpoint in which to ponder the significance of "God became human." Relying on such diverse thinkers as Emmanuel Levinas, Maurice Blanchot, Karl Rahner, and Masao Abe, Susie Paulik Babka explores visual art, images, and poetry as theological sources, designating what Blanchot called "a region where impossibility is no longer deprivation, but affirmation." Photography: Night Sky will give you the tips and techniques you need to take stunning photographs in the dark. You'll learn how to overcome the unique issues that confront nighttime photographers and capture images of which you'll be proud. Co-author Jennifer Wu, an elite Canon "Explorer of Light" professional photographer, has become renowned for her ability to capture nighttime phenomena, from quarter-phase moon rises to shooting stars to the ephemeral Milky Way. This new guide reveals her methods and concentrates on photographing four principal subjects: stars as points of light, star trails, the moon, and twilight. These subjects share common photo techniques and considerations, but each also requires a distinct approach. Once captured, your digital images must be finished on the computer; coauthor and author of the bestselling Photography: Outdoors, James Martin, delves into the settings and procedures that elevate an image from mundane to striking. This clear and practical guide will help photographers of all levels portray the stunning spectacle of the night sky, preserving those special memories and moments from a life outdoors. Past crimes, and threats of more to come if the truth be revealed, is the stronghold that had kept many living in fear and shame for years. Finally, courage has crept in and caught the cocky criminal unaware. Is it coincidences that cause the right characters to meet at crucial times, or is it an answer to the prayers and supplications of the victimized women and men? Ironically, the character instrumental in uncovering the greatest crime is the one least expected. Born in Philadelphia on December 3, 1826, George B. McClellan graduated from West Point in 1846 before serving in the Mexican War. At the start of the Civil War, McClellan was put in a position of leadership and after a successful campaign in Virginia he was given command of the Army of Potomac, one of the Union's strongest armies. He led the Peninsular campaign with almost 100,000 troops under his command. marching toward

Richmond. Although McClellan was a brilliant administrator who possessed good strategic sense, the record shows that he was overcautious and consistently overestimated the strength of his adversaries, always demanding more men and supplies before undertaking offensive action. In 1862, McClellan disagreed with Abraham Lincoln and advanced on Richmond from the east instead of moving directly, against the Confederates at Manassas, Virginia. Although the Union army was successful during the Peninsular campaign, their failure to take Richmond, the Confederate capital, gave the South new motivation. Dissatisfied with the campaign and McClellan, Lincoln replaced him with Henry W. Halleck as commander-in-chief. After the defeat of the Union army, in the Second Battle of Bull Run, he was again placed in active command of the Army of the Potomac. His overcautiousness at the battle of Antietam on September 17, 1862, led to a draw instead of a Union victory. Because of the heavy Union losses, he was again relieved of his command by Lincoln for the duration of the war. The Democratic Party nominated McClellan in 1864 as its candidate for president on a peace platform, but Abraham Lincoln defeated him. After serving as governor of New Jersey from 1878 to 1881, McClellan died in Orange, New Jersey on October 29, 1885.

M. R. James wrote his ghost stories to entertain friends on Christmas Eve, and they went on to both transform and modernise a genre. James harnesses the power of suggestion to move from a recognisable world to one that is indefinably strange, and then unforgettably terrifying. Sheets, pictures, carvings, a dolls house, a lonely beach, a branch tapping on a window, ordinary things take on more than a tinge of dread in the hands of the original master of suspense. Theological discourse in the West has consistently valued the word over the image. Aesthetics, which discerns the criteria and value of the beautiful and what "pleases the senses," is the discipline that prioritizes sensual intelligence over the rational; this book advocates a reconsideration of the doctrine of the incarnation through an aesthetics of vulnerability, in which the ethical optics of attention to the vulnerable other becomes the standpoint in which to ponder the significance of "God became human." Relying on such diverse thinkers as Emmanuel Levinas, Maurice Blanchot, Karl Rahner, and Masao Abe, Susie Paulik Babka explores visual art, images, and poetry as theological sources, designating what Blanchot called "a region where impossibility is no longer deprivation, but affirmation." The serenity of warm summer winds blowing a grassy green field was broken by the shrill ring of an incoming call. A slender white hand reached down into tattered blue jeans, drawing the cell phone out of a tight pocket, leading the echoes of the ringtone to increase in intensity throughout the field, only silenced when the call was answered and raised up to the ear of a well groomed man. Bill Pronzini is one of the most highly acclaimed mystery authors writing today. Barry N. Malzberg exploded onto the science fiction scene in the 1970s with incendiary novels and short stories that took the craft of speculative fiction to a completely different level. When these two master authors come together to collaborate on fiction, the result is literary dynamite. *On Account of Darkness and Other Stories* brings together for the first time every science fiction story that Bill and Barry wrote together during their long careers, featuring a brand-new introduction. These short, sharp stories, each a paradigm of the craft of science fiction, are prime examples of two authors working at the height of their collaborative powers, resulting in a collection of truly speculative fiction. Barry N. Malzberg is the author of

some forty science fiction novels and collections. Bill Pronzini has been a full-time professional writer since 1969. Stories included in this collection: On Account of Darkness A Clone at Last "Do I Dare to Eat a Peach?" On the Nature of Time Night Rider Opening a Vein Reading Day Fascination The Lyran Case Whither Thou, Ghost Vanishing Point Out of Quarantine Shakespeare MCMLXXXV In Our Image Another Burnt-Out Case Inaugural The Last One Left Coming Again Multiples Prose Bowl Final War Epitaph Toy The Rec Field The Hungarian Cinch Bound by a dark enchantment, only an elemental flame can light the way. Vengeance Forged in rage and sorrow, a dark witch's spell travels down her ancestral line to Violet Levina. Enchanted with the power of the entire Electromagnetic spectrum-microwaves, gamma rays, radio waves, Violet is cursed with limitless energy and the obligation to destroy an insidious creature composed of dark matter. Justice For over five hundred years, Flint has served as Fire, aiding Earth's environment and its people as one of four Elementals. Yet only once in his long existence has he been burned. A flaming redhead ignites the embers of his heart, but he finds her resistant to the heat building between them. Illumination Knowing she must fulfill her destiny, Violet travels to her home in Ireland, accompanied by the fiery Elemental. Not fooled by his charms and brazen demeanor, Violet wishes only to shield him from the coming battle, but can't deny the flames of desire flickering when she is at his side. Love While standing together against unrelenting adversaries, false friends, family betrayals, and an underlying seed of darkness, they must burn bright, or the ruthless power behind the ancient spell will turn everything to ash. With Flint as her beacon in a field of darkness, Violet will discover that love holds the most powerful magic of all. The universe is rapidly expanding. Of that much scientists are certain. But how fast? And with what implications regarding the fate of the universe? Ellen Jackson and Nic Bishop follow Dr. Alex Fillipenko and his High-Z Supernova Search Team to Mauna Kea volcano in Hawaii, where they will study space phenomena and look for supernovae, dying stars that explode with the power of billions of hydrogen bombs. Dr. Fillipenko looks for black holes--areas in space with such a strong gravitational pull that no matter or energy can escape from them--with his robotic telescope. And they study the effects of dark energy, the mysterious force that scientists believe is pushing the universe apart, causing its constant and accelerating expansion. Sexy vampires with attitudes, a strong female hunter who holds the key to their demise, and a vampire race who knows her very life is a threat. Things would be easier if she didn't love them. By day, I'm an emergency room nurse--normal enough. By night, I stalk the streets, hunting serial killers that the police can't seem to catch. Less normal, but way more fun in a twisted kinda way...until one of those serial killers turns out to be a freaking vampire. The only thing standing between me and certain death is a handsome stranger who also happens to come with fangs. Twisted or not, even I didn't see that one coming. But vampires aren't supposed to kill their own, and worse, my new friend did it for a human--it won't be long until the dead vampire's clan catches up to us. And though his hive of motorcycle riding alpha warriors each come with their own merits, not all four are friendly--some would rather throw me to our enemies than help me. It makes them especially nervous that their powers don't seem to work when I'm nearby. But it soon becomes clear that we'll need each other to get out of this alive. Are my fighting skills any match for the supernatural?

Can my hive of monsters defend me, and themselves, against the wrath of a species already on the verge of extinction? Why am I so drawn to all of them? And why choose just one? The *Born of Darkness* series is high heat reverse harem paranormal romance that features one badass female hunter, her four fated vampire mates, and provocative MFMMM scenes. In this intimate, haunting literary memoir and New York Times Notable Book of the year, an American icon tells her own story for the first time -- about a challenging and lonely childhood, the craft that helped her find her voice, and a powerful emotional legacy that shaped her journey as a daughter and a mother. One of the most celebrated, beloved, and enduring actors of our time, Sally Field has an infectious charm that has captivated the nation for more than five decades, beginning with her first TV role at the age of seventeen. From Gidget's sweet-faced "girl next door" to the dazzling complexity of Sybil to the Academy Award-worthy ferocity and depth of Norma Rae and Mary Todd Lincoln, Field has stunned audiences time and time again with her artistic range and emotional acuity. Yet there is one character who always remained hidden: the shy and anxious little girl within. With raw honesty and the fresh, pitch-perfect prose of a natural-born writer, and with all the humility and authenticity her fans have come to expect, Field brings readers behind-the-scenes for not only the highs and lows of her star-studded early career in Hollywood, but deep into the truth of her lifelong relationships--including her complicated love for her own mother. Powerful and unforgettable, *In Pieces* is an inspiring and important account of life as a woman in the second half of the twentieth century. Addicted to MDT, a drug that gives the brain extraordinary power, from learning a foreign language in a day to conquering the stock market, Eddie Spinola begins to experience the devastating side effects of this drug, forcing him to go in search of other MDT users as he stumbles upon the horrifying truth of this miracle drug. Reprint. Five short stories about adolescent, anti-contact, non-offending MAPs. This theory is the definitive explanation of gravity and dark matter. For scientists and novices who finally wish to unlock this secret phenomenon, simply read this book. Every mechanical and scientific example presented can be viewed in the natural world for anyone to draw their own conclusions, and whoever reads this book will see it for themselves. Simply written and explained, straightforward, and physically represented in the natural world, if you only read one book on gravity and dark matter, it must be this book. Winter is an Earth-like planet with two major differences: conditions are semi arctic even at the warmest time of the year, and the inhabitants are all of the same sex. Tucked away in a remote corner of the universe, they have no knowledge of space travel or of life beyond their own world. And when a strange envoy from space brings news of a vast coalition of planets which they are invited to join, he is met with fear, mistrust and disbelief . . . 'The Left Hand of Darkness' is a groundbreaking work of feminist science fiction, an imaginative masterpiece which poses challenging questions about sexuality, sexism and the organisation of society. The UCLA Department of Physics and Astronomy hosted its tenth Dark Matter and Dark Energy conference in Marina del Rey and brought together all the leaders in the field. The symposium provided a scientific forum for the latest discussions in the field. Topics covered at the symposium: •Status of measurements of the equation of state of dark energy and new experiments •The search for missing energy events at the LHC and implications for dark matter search •Theoretical calculations on all forms of dark matter (SUSY, axions, sterile neutrinos, etc.) •Status of the indirect search for dark matter •Status of the direct search for dark matter in detectors around the world •The low-mass wimp search region •The next generation of very large dark matter detectors •New underground laboratories for dark matter search
