'Impassioned, hugely informative, wonderfully controversial, and scary as hell' John le Carré Around the world in Britain, the United States, Asia and the Middle East, there are people with power who are cashing in on chaos; exploiting bloodshed and catastrophe to brutally remake our world in their image. They are the shock doctors. Exposing these global profiteers, Naomi Klein discovered information and connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling tale of how a few are making a killing while more are getting killed. 'Packed with thinking dynamite ... a book to be read everywhere' John Berger 'If you only read one non-fiction book this year, make it this one' Metro Books of the Year 'There are a few books that really help us understand the present. The Shock Doctrine is one of those books' John Gray, Guardian 'A brilliant book written with a perfectly distilled anger, channelled through hard fact. She has indeed surpassed No Logo' Independent 'Definitely entertaining ... satisfyingly pushes all the requisite Agatha Christie-style buttons' Barry Forshaw, The Independent DEATH IN PARADISE is one of BBC One's most popular series which averages 9 million viewers. 'The Perfect Run is sure to increase your appreciation and enjoyment on the run, and that's a big payback' – Runner's World The "perfect" run, when you are in a full flow and feeling totally unstoppable, can be elusive, but this practical expert guide, written by a celebrated Runner's World writer Mackenzie Havey, will ensure you find it time and time again and in the process transform your running performances. At some point in every runner's career they experience the "perfect" run, when they are in full flow and feel totally unstoppable. Your worries about the day and physical aches and pains melt away. Your body and mind are in complete sync and the run feels effortless. Even still, the path to achieving the perfect run remains mysterious. It often materializes in the unlikeliest of circumstances—in adverse weather or on a day when everything else seems to be going wrong. Conversely, when we try hard to create the right conditions for that perfect run, it often doesn't come about. In The Perfect Run, Mackenzie L. Havey reveals everyone has the potential to enjoy more joyful and flow-driven running, no matter your experience, pace, or sporting ambitions. This ground-breaking book features insights from elite athletes, neuroscientists, coaches, and everyday runners to provide a road map for how to cultivate the right conditions for the "perfect" run. These ideas will not only help facilitate the potential for more successful running but, more significantly, can also be translated into other areas of your life to help provide a sense of calmness, self-control, and fulfillment far beyond the running trails. 'If deaths are not investigated, then the authorities cannot be held to account and democracy is threatened. And if deaths are not investigated, we are not a society that values human life.' Inspired from a young age to help the marginalised and voiceless, Leslie Thomas QC has dedicated his career to fighting for the underdog and holding the State to account. This intimate and personal record of some of the most significant, controversial and disturbing legal cases of the last fifty years lays bare the very heart of the law enforcement and judicial process. It's an unforgettable account of an idealistic and outspoken lawyer's coming of age as a Black man in London, and a powerful portrait of the lives of those he has fought for. From the Grenfell Tower Inquiry, to the deaths of Christi and Bobby Shepherd by carbon monoxide poisoning, the Birmingham Pub Bombings and the police shooting of Mark Duggan, Do Right and Fear No One present a blistering argument for a level playing field in the pursuit of justice. This quirky, yet important book, breaks new ground in the study of Gaelic Ireland by exploiting the rich source material contained in the sixteenth-century Annals of Ulster, Annals of Connacht, the Annals of Loch Cé and the Four Masters. While attention has previously been paid to poetry in Irish as a source for the history of the 16th century, the richness of the prose sources have not been exploited by historians. The annals contain a series of short accounts of events arranged by year. The storytelling of the annalists provides the openings into the past that are the key to this book, which uses seven of their longer stories to examine, at micro level, aspects of Gaelic society that created them. The significance of each story is illuminated by reference to other contemporary evidence, including the genealogies and the poetry. The text is provided in both the original Irish with an English language translation, with extensive writings placing the passages in their historical time. In the summer of 2016, Disney introduced its first Latina princess, Elena of Avalor. Princesa of the Periphery explores this Disney property using multiple case studies to understand its approach to girlhood and Latinidad. Following the circuit of culture model, author Diana Leon-Boys teases out moments of complex negotiations by Disney, producers, and audiences as they navigate Elena's circulation. Case studies highlight how a flexible Latinidad is deployed through corporate materials, social media pages, theme park experiences, and the television series to create a princess who is both marginal to Disney's normative vision of princesshood and central to Disney's claims of diversification. This multi-layered analysis of Disney's mediated Latina girlhood interrogates the complex relationship between the U.S.'s largest ethnic minority and a global conglomerate that stands in for the U.S. on the global stage. The most accomplished mountain runner of all time contemplates his record-breaking climb of Mount Everest in this profound and free-flowing memoir—an intellectual and spiritual journey that moves from the earth's highest peak to the soul's deepest reaches. As the novel coronavirus (Covid-19) spread around the world, so did theories, stories, and conspiracy beliefs about it. These theories infected communities from the halls of Congress to Facebook groups, spreading quickly in newspapers, on various social media and between friends. They spurred debate about the origins, treatment options and responses to the virus, creating distrust towards public health workers and suspicion of vaccines. This book examines the most popular Covid-19 theories, connecting current conspiracy beliefs to long-standing fears and urban legends. By examining the vehicles and mechanisms of Covid-19 conspiracy, readers can better understand how theories spread and how to respond to misinformation. This edited collection offers an original critical clinical approach to social work practice, written by social work educators from the School of Social Work at Dalhousie University and their collaborators. It provides a Canadian perspective on the diverse issues social workers encounter in the field, highlighting the practical application of feminist, narrative, anti-racist, and postcolonial frameworks. With the aim of producing counterstories that participate in social resistance, this volume focuses on integrating critical theory with direct clinical practice. Through the use of case studies, the contributors tackle a range of substantive issues including ethics, working with complex trauma, men's use of violence, substance use among women and girls, Indigenous social work praxis, critical child welfare approaches, counterstorying experiences of (dis)Ability, and animal-informed social work practice. A remote community, touched by evil - would you know who to trust? Raven Black is the first book in Ann Cleeves' Shetland series - which is now the major BBC1 drama starring Douglas Henshall, SHETLAND. It is a cold January morning and Shetland lies buried beneath a deep layer of snow. Trudging home, Fran Hunter's eye is drawn to a vivid splash of colour on the white ground, ravens circling above. It is the strangled body of her teenage neighbour Catherine Ross. As Fran opens her mouth to scream, the ravens continue their deadly dance . . . The locals on the quiet island stubbornly focus their gaze on one man - loner and simpleton Magnus Tait. But when police insist on opening out the investigation a veil of suspicion and fear is thrown over the entire community. For the first time in years, Catherine's neighbours nervously lock their doors, whilst a killer lives on in their midst. Also available in the Shetland series are White Nights, Red Bones, Blue Lightning and Dead Water. Ann Cleeves' Vera Stanhope series (ITV television drama VERA) contains five titles, of which The Glass Room is the most recent. When do you think the Second World War ended? If the end of the war was supposed to have brought 'freedom' to countries that suffered under Nazi occupation, then for millions it did not really end until the fall of Communism. In the summer of 1945 many of the countries in Eastern Europe simply swapped the rule of one tyrant, Adolf Hitler, for that of another: Joseph Stalin. Why this happened has remained one of the most troubling questions of the entire conflict, and is at the heart of Laurence Rees' dramatic book. In World War II: Behind Closed Doors, Rees provides an intimate 'behind the scenes' history of the West's dealings with Joseph Stalin - an account which uses material only available since the opening of archives in the East as well as new testimony from witnesses from the period. An enthralling mix of high politics and the often heart-rending personal experiences of those on the ground, it will make you rethink what you believe about World War II. This edited volume focuses on Spanish use in education, public spaces, and social media in five macro-regions of the United States: the Southwest, the West, the Midwest, the Northeast, and the Southeast. Also includes Miller, Van den Bogaerd and allied families. A mysterious package from Querétaro, a visit from the Mexican police, and an unexpected discovery in Oaxaca require Jamie's return to Mexico. Temporomandibular disorders (TMDs), are a set of more than 30 health disorders associated with both the temporomandibular joints and the muscles and tissues of the jaw. TMDs have a range of causes and often co-occur with a number of overlapping medical conditions, including headaches, fibromyalgia, back pain and irritable bowel syndrome. TMDs can be transient or long-lasting and may be associated with problems that range from an occasional click of the jaw to severe chronic pain involving the entire orofacial region. Everyday activities, including eating and talking, are often difficult for people with TMDs, and many of them suffer with severe chronic pain due to this condition. Common social activities that most people take for granted, such as smiling, laughing, and kissing, can become unbearable. This dysfunction and pain, and its associated suffering, take a terrible toll on affected individuals, their families, and their friends. Individuals with TMDs often feel stigmatized and invalidated in their experiences by their family, friends, and, often, the health care community. Misjudgments and a failure to understand the nature and depths of TMDs can have severe consequences - more pain and more suffering - for individuals, their families and our society. Temporomandibular Disorders: Priorities for Research and Care calls on a number of stakeholders - across medicine, dentistry, and other fields - to improve the health and well-being of individuals with a TMD. This report addresses the current state of knowledge regarding TMD research, education and training, safety and efficacy of clinical treatments of TMDs, and burden and costs associated with TMDs. The recommendations of Temporomandibular Disorders focus on the actions that many organizations and agencies should take to improve TMD research and care and improve the overall health and well-being of individuals with a TMD. 'When one of the world's leading scholars of civil war tells us that a country is on the brink of violent conflict, we should pay attention. This is an important book' Steven Levitsky and Daniel Ziblatt, authors of How Democracies Die Civil wars are the biggest danger to world peace today - this book shows us why they happen, and how to avoid them. Most of us don't know it, but we are living in the world's greatest era of civil wars. While violence has declined worldwide, civil wars have increased. This is a new phenomenon. With the exception of a handful of cases - the American and English civil wars, the French Revolution - historically it has been rare for people to organise and fight their governments. This has changed. Since 1946, over 250 armed conflicts have broken out around the world, a number that continues to rise. Major civil wars are now being fought in countries including Iraq, Syria and Libya. Smaller civil wars are being fought in Ukraine, India, and Malaysia. Even countries we thought could never experience another civil war - such as the USA, Sweden and Ireland - are showing signs of unrest. In How Civil Wars Start, acclaimed expert Barbara F. Walter, who has advised on political violence everywhere from the CIA to the U.S. Senate to the United Nations, explains the rise of civil war and the conditions that create it. As democracies across the world backslide and citizens become more polarised, civil wars will become even more widespread and last longer than they have in the past. This urgent and important book shows us a path back toward peace. Common Sense Natural Beekeeping teaches aspiring as well as experienced beekeepers how to keep their bees healthy and productive without depending on unnatural chemical or human intervention. Gutierrez (*El Tigre: The Adventures of Manny Rivera*). Latinos across the United States are redefining identities, pushing boundaries, and awakening politically in powerful and surprising ways. Many—Afrolatino, indigenous, Muslim, queer and undocumented, living in large cities and small towns—are voices who have been chronically overlooked in how the diverse population of almost sixty million Latinos in the U.S. has been represented. No longer. In this empowering cross-country travelogue, journalist and activist Paola Ramos embarks on a journey to find the communities of people defining the controversial term, “Latinx.” She introduces us to the indigenous Oaxacans who rebuilt the main street in a post-industrial town in upstate New York, the “Las Poderosas” who fight for reproductive rights in Texas, the musicians in Milwaukee whose beats reassure others of their belonging, as well as drag queens, environmental activists, farmworkers, and the migrants detained at our border. Drawing on intensive field research as well as her own personal story, Ramos chronicles how “Latinx” has given rise to a sense of collectivity and solidarity among Latinos unseen in this country for decades. A vital and inspiring work of reportage, *Finding Latinx* calls on all of us to expand our understanding of what it means to be Latino and what it means to be American. The first step towards change, writes Ramos, is for us to recognize who we are. This book provides strategies to deal with conflict, to recognize when 'worries about weight' may lead to more serious problems, to maintain a connection when girls 'tune out' and have self-deprecating, negative feelings. “DO NOT MISS THIS BOOK. "Business during the Week was very dull. The great Plague of the Year Cholera is driving every Country [person] and Merchants from Surrounding Cities away. Mersman was a liquor merchant, a German American immigrant who aspired--with success--to become a self-made man. The diary he kept from 1847 to 1864 provides an intriguing account of life in Cincinnati and St. Louis--America's emerging frontier. Outside of Gold Rush diaries and emigration journals, few narrative records of the antebellum period have been published. As a record of both the man and the time in which he lived, *The Whiskey Merchant's Diary* is a valuable resource for social historians, providing significant details about bachelorhood, whiskey making, ballroom dancing, circus history, card games, steamboat transportation, gender roles, theater history, and Victorian etiquette. The diary is also the story of a man who confronted serious disease, and his descriptions of cholera and syphilis are exceptional. Complemented by photographs, maps, and period advertisements, the diary reveals how a German American businessman worked to establish himself in his newly adopted country during an era that was rife with opportunity. Linda A. Fisher's professional training as a physician makes the public health aspect of this project particularly valuable, and her annotations throughout serve to emphasize the significance of Mersman's firsthand observations.
