Ishigami's design takes inspiration from roofs, the most common architectural feature used around the world. The design of the 2019 Serpentine Pavilion is made by arranging slates to create a single canopy roof that appears to emerge from the ground of the surrounding park. Within, the interior of the Pavilion is an enclosed cave-like space, a refuge for contemplation. For Ishigami, the Pavilion articulates his 'free space' philosophy in which he seeks harmony between man-made structures and those that already exist in nature. American tourists are being chased across Australia by terrorists because their laptop contains files the terrorists need for a bomb plot in Sydney. Of course the Americans think the laptop contains only photos and personal documents. The terrorists try stalking, burglary, seduction, blackmail, ambush and a high speed car chase without success. Are the Americans very lucky, or are they under divine protection? In the fall of 1930, David Packard left his hometown of Pueblo, Colorado, to enroll at Stanford University, where he befriended another freshman, Bill Hewlett. After graduation, Hewlett and Packard decided to throw their lots in together. They tossed a coin to decide whose name should go first on the notice of incorporation, then cast about in search of products to sell. Today, the one-car garage in Palo Alto that housed their first workshop is a California historic landmark: the birthplace of Silicon Valley. And Hewlett-Packard has produced thousands of innovative products for millions of customers throughout the world. Their little company employs 98,400 people and boasts constantly increasing sales that reached \$25 billion in 1994. While there are many successful companies, there is only one Hewlett-Packard, because from the very beginning, Hewlett and Packard had a way of doing things that was contrary to the prevailing management strategies. In defining the objectives for their company, Packard and Hewlett wanted more than profits, revenue growth and a constant stream of new, happy customers. Hewlett-Packard's success owes a great deal to many factors, including openness to change, an unrelenting will to win, the virtue of sustained hard work and a company-wide commitment to community involvement. As a result, HP now is universally acclaimed as the world's most admired technology company; its wildly successful approach to business has been immortalized as The HP Way. In this book, David Packard tells the simple yet extraordinary story of his life's work and of the truly exceptional company that he and Bill Hewlett started in a garage 55 years ago.

This volume uses the extreme case of misers to examine interlocking categories that undergirded the emergence of modern British society, including new perspectives on charity, morality, and marriage; new representations of passion and sympathy; and new modes of saving, spending, and investment. *Misers* surveys this class of people—as invented and interpreted in sermons, poems, novels, and plays; analyzed by economists and philosophers; and profiled in obituaries and biographies—to explore how British attitudes about saving money shifted between 1700 and 1860. As opposed to the century before, the nineteenth century witnessed a new appreciation for misers, as economists credited them with adding to the nation's stock of capital and novelists newly imagined their capacity to empathize with fellow human beings. These characters shared the spotlight with real people who posthumously donned that label, populating into a cottage industry of miser biographies by the 1850s. By the time *A Christmas Carol* appeared in 1843, many Victorians had come to embrace misers as links that connected one generation's extreme saving with the next generation's virtuous spending. With a broad chronological period, this volume is useful for students and scholars interested in representation of misers in eighteenth- and nineteenth-century Britain.
