Once Upon a Time in Brick Lane May 15 2022

Vintage photographs taken in London's East End that are full of surprise and humanity. Paul Trevor is one of the unsung heroes of British photography and this is his unique collection of photos of one of the most iconic corners of London. Brick Lane is photographed more than almost any other street in the capital yet these elegant black and whites taken in the 70s, 80s and 90s capture something different: a now vanished era freedom and joy and full of grit. This is honest street photography in the very best tradition of Cartier-Bresson.

He is playing a dangerous game risking his life and others, using all of his genius, cleverness and guile to buy the freedom of millions of people. Melchior uses science, faith and courage against the power of his evil enemies. Who will win this contest? This is not your typical science fiction novel. This technology has been around for some time but this concept is rarely employed by modern sci-fi, so it feels new. The compelling and likeable characters cast a spell on you that you won't likely forget. They use what God has revealed and humans have developed to create a new civilization beyond the reach of tyranny.
