Max, and I am an asshole. I get
excessively drunk at
inappropriate times, disregard
social norms, indulge every
whim, ignore the consequences

of my actions, mock idiots and
posers, sleep with more women
than is safe or reasonable, and
just generally act like a raging
dickhead. But, I do contribute
to humanity in one very
important way: I share my
adventures with the world. --

reader feedback: "I find it truly
appalling that there are people
in the world like you. You are a
disgusting, vile, repulsive,
repugnant, foul creature.
Because of you, I don't believe
in God anymore. No just God
would allow someone like you
to exist." "I'll stay with God as
my lord, but you are my savior.
I just finished reading your
brilliant stories, and I laughed
so hard I almost vomited. I

want to bring that kind of joy to
people. You're an artist of the
highest order and a true
humanitarian to boot. I'm in
both shock and awe at how
much I want to be you." My

Studies the influential tradition of 'theological utilitarianism' in the eighteenth century through the lens of William Paley's life and thought. This report examines the scientific basis for the use of remotely sensed data, particularly Normalized Difference Vegetation Index

(NDVI), primarily for the assessment of land degradation at different scales and for a range of applications, including resilience of agro-ecosystems. Evidence is drawn from a wide range of investigations, primarily from the scientific peer-reviewed literature but also non-journal sources. The literature review has been corroborated by interviews with leading specialists in the field. The report reviews the use of NDVI for a range of themes related to land degradation, including land cover change, drought monitoring and early warning systems, desertification processes, greening trends, soil erosion and salinization,

vegetation burning and recovery after fire, biodiversity loss, and soil carbon. This SpringerBrief also discusses the limits of the use of NDVI for land degradation assessment and potential for future directions of use. A substantial body of peer-reviewed research lends unequivocal support for the use of coarse-resolution time series of NDVI data for studying vegetation dynamics at global, continental and sub-continental levels. There is compelling evidence that these data are highly correlated with biophysically meaningful vegetation characteristics such as photosynthetic capacity and primary production that are

closely related to land degradation and to agroecosystem resilience. A spirited reevaluation of the public moralists who shaped public policy in nineteenth-century America, Mugwumps: Public Moralists of the Gilded Age provides a refreshing look at a group of Americans whose importance to the history of our country has commonly been dismissed. A public interest group that labeled the generation following the American Civil War as the "Gilded Age," Mugwumps were college-educated individuals who lived the lessons of their moral philosophy--Christian values, republican virtue, and classical liberalism. Tracing

Mugwump values back before the term was commonly used, Tucker defines these liberals as benevolent and altruistic, active campaigners against slavery and imperialism, and for sound money, lower tariffs, and civil service reform. The earliest Mugwumps took on the self-assigned task of advocating public principles over private interests. Evaluations of these public moralists during the 1950s and 1960s, however, did not paint the Mugwumps in so positive a light. Awash in the popular New Deal public policies that advocated positive government intervention and regulation in the economy, these studies dismissed Mugwump liberalism

as outdated. More specifically, the reformers were criticized as being self-interested failures. Tucker obliges readers to look beyond such dismissals to the history and accomplishments of Mugwumps as a whole. Unlike previous historians, Tucker examines the antebellum roots of the Mugwumps and follows their ever-increasing participation in American government throughout the nineteenth century. Tucker portrays Mugwumps not as selfish agents of the middle class but as fascinating practitioners of eighteenth-century public virtue and nineteenth-century social science. This book forcefully

challenges previous studies on the Mugwumps and restores these public moralists to the mainstream of nineteenth-century American history. Their concerns for morality and free-market economics are again fashionable in contemporary politics and deserving of fresh attention from both the general reader and the scholar. Using espionage as a test case, *The End of Intelligence* criticizes

claims that the recent information revolution has weakened the state, revolutionized warfare, and changed the balance of power between states and non-state actors—and it assesses the potential for realizing any hopes we might have for reforming intelligence and espionage. Examining espionage, counterintelligence, and covert action, the book argues that, contrary to prevailing views, the information revolution is increasing the power of states relative to non-state actors and threatening privacy more than secrecy. Arguing that intelligence organizations may be taken as the paradigmatic

organizations of the information age, author David Tucker shows the limits of information gathering and analysis even in these organizations, where failures at self-knowledge point to broader limits on human knowledge—even in our supposed age of transparency. He argues that, in this complex context, both intuitive judgment and morality remain as important as ever and undervalued by those arguing for the transformative effects of information. This book will challenge what we think we know about the power of information and the state, and about the likely twenty-first century fate of secrecy and

privacy. Son of Forgotten Hollywood Forgotten History is the long anticipated sequel to the award-winning Forgotten Hollywood Forgotten History, and it tells more rarely shared American stories through the eyes of 21 character actors of Hollywood's Golden Age, including Frank Morgan, Peter Lorre, Cesar Romero, Majorie Main, Andy Devine, Alan Hale Sr., Leo Gorcey, Jack Carson, and Lon Chaney Jr. Son of Forgotten Hollywood Forgotten History is part of the Forgotten Hollywood Book-Series, and it's officially in gift stores, bookshops, and iconic locations, such as the Hollywood Heritage Museum. Lamb offer an incisive overview of America's turbulent experience with special operations. Starting with in-depth interviews with special operators, the authors illustrate the diversity of modern special operations forces and the strategic value of their unique attributes. Despite longstanding and growing public fascination with special operators, these forces and their contribution to national security are poorly

understood. With this book, Tucker and Lamb dispel common misconceptions and offer a penetrating analysis of how these unique and valuable forces can be employed to even better effect in the future. The book builds toward a comprehensive assessment of the strategic utility of special operations forces, which it then considers in light of the demands of future warfare. This second edition of United States Special Operations Forces, revised throughout to account for lessons learned in the twelve years since its first publication, includes two new case studies, one on High Value Target Teams and another on Village Stability Operations,

and two new appendixes charting the evolution of special operation missions and the best literature on all aspects of U.S. special operation forces. Scottish Highland Railways describes eight great journeys by rail through northern Scotland, detailing the history of the lines while travelling along their modern-day routes. In addition, the landscapes, regional history, stations and services available are all described. With over 100 present-day and archive photographs and maps, this book provides the histories of the railways of the east coast, the Grampian region, the highland main line and the Far North, West Highland and

Oban, Mallaig and Kyle of Lochalsh lines. A railway company 'family tree' is given and a timeline documenting the many mergers and changes over time. The recent history of these railways in the 20th and 21st centuries is given along with a list of operational stations in 2020 together with passenger usage statistics. There are also details of rail organizations and regulations in Scotland. Each edition contains "the names and origin of the civil divisions, and the names and dates of election or appointment of the principal state and county officers from the Revolution to the present time." List for March 7, 1844, is the list for September 10,

1842, amended in manuscript. William Tucker (born 1935) is a British-born sculptor who moved to North America in 1976 and became an American citizen in 1986. Tucker began making sculpture in the late 1950s and came to public prominence in the New Generation 1965 exhibition at the Whitechapel Art Gallery in London. Moving to the US, Tucker established his reputation in a newly expressive and increasingly bodily sculptural form. This is the first major monograph on his work and includes a complete catalogue of his sculpture to date. It will be essential reading for artists, art historians, curators, dealers

and all those with an interest in the recent history and current practice of sculpture. Empire of Liberty takes a new look at the public life, thought, and ambiguous legacy of one of America's most revered statesmen, offering new insight into the meaning of Jefferson in the American experience. This work examines Jefferson's legacy for American foreign policy in the light of several critical themes which continue to be highly significant today: the struggle between isolationists and interventionists, the historic ambivalence over the nation's role as a crusader for liberty, and the relationship between democracy and peace. Written

by two distinguished scholars, this book provides invaluable insight into the classic ideas of American diplomacy. A collection of documents supplementing the companion series known as "Colonial records of Pennsylvania" which contain the minutes of the Provincial Council, of the Council of Safety, and of the Supreme Executive Council of Pennsylvania. David Tucker's debut collection, Late for Work, follows reporters jostling for headlines, evoking the gritty glamour of the newsroom in wry, poignant poems. With a twenty-eight-year career at top city papers, Tucker is on the New Jersey Star-Ledger team

that won the 2005 Pulitzer for breaking news. With a seasoned journalist's gaze, Tucker finds beauty, pathos, humor, and poetry all around us. Memorial and biographical history of Ellis county, Texas: containing a history of this important section of the great state of Texas, from the earliest period of its occupancy to the present time, together with glimpses of its future prospects, with full-page portraits of the presidents of the United States, and also full-page portraits of some of the most eminent men of the county, and biographical mention of many of its pioneers, and also of prominent citizens of to-day.
