Some may only know the jazz legend Stan Getz, tenor saxophonist, for his bossa nova hits "Desafinado" and "The Girl from Ipanema." However, Getz, born in 1927, began to play professionally at age 15, and his rich musical career lasted until shortly before his death on June 6, 1991. He played in a wide variety of musical settings such as big band, orchestral, quartet, and duo. The incredible beauty of his sound sparked the late jazz great John Coltrane to say, "We would all play like Stan Getz, if we could." When Getz died, jazz trumpeter Dizzy Gillespie said, "He was sheer genius. And there's one thing about this man, he was the most melodic player on the jazz scene." This bibliography, the first of its kind, contains a total of 2,576 bibliographic citations with 2,292 of them annotated. It includes references to periodical literature, articles from news wire services, books, dissertations, films, videos, television programs, radio broadcasts, and Web sites. The citations are primarily from English-language sources. Materials in English and French as well as a handful of items from other languages are annotated. This work includes a preface that contains the scope of the work, a user's guide, and a list of more than 340 periodicals cited. The main body of the work is divided into the following sections: album reviews, performance reviews, discographies and discographical information, transcriptions, biographical and critical works, filmography, and appendix. Album reviews are provided for 240 albums, along with the discographical details for each of these albums. The appendix contains unannotated citations to materials in Danish, Dutch, German, Italian, Norwegian, Spanish and Swedish. Also included are new chapters on computerized assessment and developing relations with other professionals, including clinical neuropsychologists, neurologists, primary care physicians, neurosurgeons, and psychiatrists. The most current information on United States secondary schools-- both public and private-- in a quick, easy-to-use format. Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges; and the Hand book of the American Economic Association. Using archival documents, music prints, manuscripts and contemporary writing, Getz examines the musical culture of sixteenth-century Milan. The book investigates the musician's role as an actor and a functionary in the political, religious, and social spectacles produced by the Milanese church, state and aristocracy within the city's diverse urban spaces. Furthermore, it establishes a context for the numerous motets, madrigals, and lute intabulations composed and printed in sixteenth-century Milan by examining their function within the urban milieu in which they were first performed. Evangelical Christianity--the faith professed by one in four Americans--exerts an enormous influence in American society. Believed by some to have originated as a reaction to the social revolution of the 1960s, evangelicalism as a distinct subculture in fact dates to the advent of radio. The evangelical faithful flocked to the airwaves, developing a nationwide mass culture as listeners across denominational lines heard the same popular preachers and music. Evangelicals left behind the fundamentalism of the early 20th century as broadcast ministries laid the foundation for the culturally engaged New Christian Right of the late 20th century. This historical ethnography presents the era's major radio evangelists and songwriters in the own words, drawing on their writings and recordings, as well as songbooks, liner notes and "song story" anthologies of the period. Much remains to be known about occupational safety and health, occupational diseases, legislation, practices, and cases worldwide, as well as the implications for sustainable development in different countries in pandemic crisis conditions. Thus, a better understanding of the different safety and health management developments across different contexts to assess their impact on sustainability is needed. The Handbook of Research on Key Dimensions of Occupational Safety and Health Protection Management discusses the necessity to protect the workforce and the importance of occupational safety and health management. This book will encourage organizations to create a preventative safety and health culture. Covering topics such as economic development, employment injury insurance, and personnel security, this book is an excellent resource for managers of public and private organizations, executives, professionals, researchers, policymakers, human resource managers, government authorities, professionals, students, and academicians. When it first appeared in 1984 The Christian College was the first modern comprehensive history of Protestant higher education in America. Now this second edition updates the history, featuring a new chapter on the developments of the past two decades, a major introduction by Mark Noll, a new preface and epilogue, and a series of instructive appendixes. Bioinformatics covers practical important topics in the analysis of protein sequences and structures. It includes comparing amino acid

sequences to structures comparing structures to each other, searching information on entire protein families as well as searching with single sequences, how to use the Internet and how to set up and use the SRS molecular biology database management system. Finally, there are chapters on multiple sequence alignment and protein secondary structure prediction. Bioinformatics will be invaluable to occasional users of these techniques as well as experienced professionals or researchers. This book presents an engaging, detailed portrait of the people, ideas, and beliefs that made up the world of English medieval medicine between 750 and 1450, a time when medical practice extended far beyond modern definitions. The institutions of court, church, university, and hospital--which would eventually work to separate medical practice from other duties--had barely begun to exert an influence in medieval England, writes Faye Getz. Sufferers could seek healing from men and women of all social ranks, and the healing could encompass spiritual, legal, and philosophical as well as bodily concerns. Here the author presents an account of practitioners (English Christians, Jews, and foreigners), of medical works written by the English, of the emerging legal and institutional world of medicine, and of the medical ideals present among the educated and social elite. How medical learning gained for itself an audience is the central argument of this book, but the journey, as Getz shows, was an intricate one. Along the way, the reader encounters the magistrates of London, who confiscate a bag said by its owner to contain a human head capable of learning to speak, and learned clerical practitioners who advise people on how best to remain healthy or die a good death. Islamic medical ideas as well as the poetry of Chaucer come under scrutiny. Among the remnants of this far distant medical past, anyone may find something to amuse and something to admire. Slendid illustrations of Cycladic marble figures in American collections are featured in this book, including two dozen complete and fragmentary pieces in the Getty Museum. The origin and development of the sculptures as well as their patronage and manufacture are examined. Examining the academic library within a contextual framework (of colleges, universities, and American society), this work provides analysis of the institution's content and function. Rather than concentrating on management issues, this book emphasizes the structure, organization, decision making and operations of academic libraries.
