Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. Some of us are limited, not by our disabilities, but our abilities. Most of us overcome limitations, while others fail to grow. *Disabilities* explores the lives of four characters as they struggle to overcome their unique disabilities -- only one of which is physical. Carlin, an aggressive, no-nonsense engineer who is paralyzed in an auto accident, must come to grips with his new mobility problems, while his son must break free of the stifling influence of his overbearing father. Sarah, too, has family issues, but her disability focuses on a moral

crisis that will test her ability to grow into the woman she wants to be. Her boyfriend, Lionel (Li, for short) has the greatest disability of all, yet fails to understand that he is limited. Who will succeed, and who will fail? It is a convoluted tale of abilities that limit and disabilities that offer freedom. Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. Haynes offers the best coverage for cars, trucks, vans, SUVs and motorcycles on the market today. John Reddie was just twelve years old when his mother bought him his first car. It was a 1935 Plymouth rumble-seat coupe and cost just \$15. This was the beginning of his lifelong love of and fascination with vintage American cars. In this memoir, Reddie gives a glimpse of his life as he reflects on all of the cars he's owned and all of the cars he could have owned. From the

misadventures to the successes, *Cars I Loved and Lost* narrates a trip down memory lane—from the first car that actually ran to the first car he actually drove. With a few repair tips included, Reddie's story recalls fond memories through the lens of the automobile. Apparently I am not alone in my fondness for these gems. People invest considerable time and money into these cars, and why? Well, maybe they share my appreciation for them, in other words; they too grew up with these automobiles. They remind us of a different time, back when we were younger and carefree, when our biggest worry was having enough gasoline to get around for a day or so, even though it cost twenty five cents a gallon. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
