Italian research centers for what concerns CL. The organization of the conference is the result of a fruitful conjoint effort of different research groups (Università di Torino, Università di Roma Tor Vergata and FBK) showing the nationwide spreading of CL in Italy. As in the first edition, the main aim of the event is at establishing a reference forum on CL, covering all the aspects needed to describe the multi-faceted and cross-disciplinary reality of the involved research topics and of the Italian community working in this area. Indeed the spirit of CLiC-it is inclusive, in order to build a scenario as much as possible comprehensive of the

complexity of language phenomena and approaches to address them, bringing together researchers and scholars with different competences and skills and working on different aspects according to different perspectives. The large number of researchers that have decided to present their work at CLiC-it and the number of directions here investigated are proof of the maturity of our community and a promising indication of its vitality. We received a total of 64 paper submissions, out of which 52 have been accepted to appear in the Conference Proceedings, which are available online and on the OpenEdition platform.

Overall, we collected 129 authors from 15 countries. This manual will be an indispensable research tool for everyone interested in the Sardinian language and in Romance linguistics in general. "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt This work has been selected by scholars as being culturally important, and is part of the knowledge base of

As Saul and Drew investigate, they encounter a terrifying cycle of revenge that began in World War II and now forces sons to pay for their fathers' darkest sins. for peak power and limitless performance. The Porsche 911 inspires a worldwide ripple effect. When Ferdinand Porsche could not find a sports car he liked, he decided to build one himself. And now, the rest is history: Jerry Seinfeld drives it; Boris Johnson admires it; Steve McQueen loves it; and Jeremy Clarkson hates it. The Porsche 911 moves the world. Despised by many in Germany as a set of wheels for fat cats, it is the favorite car of free spirits and intellectuals in the U.S. and across the globe. The Porsche 911 was not just invented by one of the most fascinating and controversial families - it is also a technical meisterwerk. Since its launch

in 1963, the 911 has built a reputation for itself as "the thinking man's sports car." Both a car and a cultural icon, it has earned a fan base that spans from young to old, East to West, connoisseur to enthusiast. Porsche 911: The Ultimate Sportscar as Cultural Icon explains how this German car became a global phenomenon and a symbol of aspiration, freedom, and the appetite for perfection, and even more, why, around the world, the 911 continues to fascinate gentlemen, ladies, and rogue drivers. In this book, Ulf Poschardt sends Porsche drivers to the shrink and concludes that a little narcissism can be a healthy thing; he then

takes them on an engaging journey through the checkered history that defines their pride and joy. Not everyone can, nor indeed should, drive a Porsche, but Porsche 911: The Ultimate Sportscar as Cultural Icon lays bare the raw driving force behind the 911 for anyone intrepid enough to discover. After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job and confines herself in her family home. One day, she meets her brother's best friend, and her soul makes a first step to healing.

An examination of the greening of the automotive industry by the path dependence of countries and carmakers' trajectories. Three sources of path dependency can be detected: business models, consumer attitudes, and policy regulations. The automobile is changing and the race towards alternative driving systems has started! The narrator, a fourteen-year-old boy, describes the cruel customs of a village, including the horrible death of his father, and spends time with a prisoner who explains the strange events in the village. The Handbook of International Futurism is the first reference work ever to presents in a comparative

fashion all media and countries in which the movement, initiated by F.T. Marinetti in 1909, exercised a particularly noteworthy influence. The handbook offers a synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty-eight countries. While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia, it treats Futurism as an international, multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth-century avant-garde. Hundreds of

artists, who in some phase in their career absorbed Futurist ideas and stylistic devices, are presented in the context of their national traditions, their international connections and the media in which they were predominantly active. The handbook acts as a kind of multi-disciplinary, geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact. Recull les ponències i comunicacions presentades i discutides dins les Jornades d'història de l'art a Catalunya, que es celebraren a Valls al juny del 2006, i que fou un

marc de trobada obert entre investigadors universitaris i els estudiosos del nostre patrimoni barroc que treballen en l'àmbit dels museus, en els centres d'estudis comarcals i locals, i en el camp de la restauració-conservació. La proposta en el seu dia avançada pel Museu de Valls va ser recollida, atesa l'excel·lència de la tradició artística barroca de la ciutat, amb la figura insigne de Lluís Bonifàs i Massó (1730-1786), de qui celebràvem els 275 anys del naixement, i la del seu germà Francesc Bonifàs (1735-1806), de qui es complien 200 anys de la mort. D'altra banda, l'origen vallenc de l'arquitecte i historiador Cèsar Martinell i Brunet

(1888-1973), il lustre precursor en la reivindicació i en l'estudi de l'escultura i l'arquitectura barroques feien encara més adient la seu de Valls per a aquestes Jornades. This book presents the latest scientific and management information on multiaged silviculture, an emerging strategy for managing forestry systems worldwide. Over recent decades, forest science and management have tended to emphasize plantation silviculture. Whilst this clearly meets our wood production needs, many of the world's forests need to be managed far less intensively and more flexibly in order to maintain their natural ecosystem

functions together with the values inherent in those processes. Developing multiaged management strategies for these complex forest ecosystems represents a global challenge to successfully integrate available science with sustainable management practices. Multiaged Silviculture covers the ecology and dynamics of multiaged stands, the management operations associated with regeneration, tending, and stocking control, and the implications of this strategy on production, genetic diversity, and stand health. It is primarily aimed at graduate level students and researchers in the fields of forestry and

silviculture, but will also be of relevance and use to all professional foresters and silviculturists.
