Renewing the Maya World Feb 12 2022 Each year in the Highland Guatemala town of Santiago Momostenango, Maya religious societies, dance teams, and *cofradías* perform the annual cycle of rituals and festivals prescribed by *Costumbre* (syncretized Maya Christian religion), which serves to renew the cosmic order. In this richly detailed ethnography, Garrett Cook explores how these festivals of *Jesucristo* and the saints derive from and reenact three major ancient Maya creation myths, thus revealing patterns of continuity between contemporary expressive culture and the myths, rituals, and iconography of the Classic and Postclassic Maya. Drawing on fieldwork conducted in the 1970s and renewed in the 1990s, Cook describes the expressive culture tradition performed in and by the *cofradías* and their dance teams. He listens as dancers and *cofrades* explain the meaning of service and of the major ritual symbols in the cults of the saints and *Jesucristo*. Comparing these symbols to iconographic evidence from Palenque and myths from the *Popol Vuh*, Cook persuasively argues that the expressive culture of Momostenango enacts major Maya creation myths—the transformative sunrise, the representation of the year as the life cycle of anthropomorphized nature, and the erection of an *axis mundi*. This research documents specific patterns of continuity and discontinuity in the communal expression of Maya religious and cosmogonic themes. Along with other recent research, it demonstrates the survival of a basic Maya pattern—the world-creating vegetative renewal cycle—in the highland Maya cults of the saints and *Jesucristo*.

Troilo. A Theory of Everything Oct 28 2020 Writing about Troilo over a century after his birth and nearly fifty years after his death implies a certainty: the artist, who performed with him, in all but a few cases, no longer exist. That vast absence compels us to seek Troilo where he never left: the music. “Troilo: Biography of Argentina” is a music book, but also a precise and rigorous painting of a mobilized, vigorous and encompassing country where culture –and tango– were in the spotlight. It might well be read as a text that uncovers the keys of growth and decline of Argentina

Technology, Design and the Arts - Opportunities and Challenges Mar 13 2022 This open access book details the relationship between the artist and their created works, using tools such as information technology, computer environments, and interactive devices, for a range of information sources and application domains. This has produced new kinds of created works which can be viewed, explored, and interacted with, either as an installation or via a virtual environment such as the Internet. These processes generate new dimensions of understanding and experience for both the artist and the public's relationships with the works that are produced. This has raised a variety of interdisciplinary opportunities and issues, and these are examined. The symbiotic relationship between artistic works and the cultural context in which they are produced is reviewed. Technology can provide continuity by making traditional methods and techniques more efficient and effective. It can also provide discontinuity by opening up new perspectives and paradigms. This can generate new ideas, and produce a greater understanding of artistic processes and how they are implemented in practice. Tools have been used from the earliest times to create and modify artistic works. For example, naturally occurring pigments have been used for cave paintings. What has been created provides insight into the cultural context and social environment at the time of creation. There is an interplay between the goal of the creator, the selection and use of appropriate tools, and the materials and representations chosen. Technology, Design and the Arts - Opportunities and Challenges is relevant for artists and technologists and those engaged in interdisciplinary research and development at the boundaries between these disciplines.
