Great Moments in Science Feb 11 2022

Pigeon Poo, the Universe and Car Paint Oct 15 2019

The first in a new Karl Kruszelnicki series, this book contains 40 bizarre and funny stories about the latest discoveries in science, from sex and forgetting, to the moon and green cheese.

Vital Science Jun 15 2022 Get your pulse racing with Australia's most popular scientist, Dr Karl Kruszelnicki. Discover why

people tell lies, why some planets are hotter than stars and how humans are terraforming the Earth. Is cockroach milk really the next Superfood? Why are birds so smart? Why do trees need each other to grow and how do they communicate? Why did a group of scientists voluntarily starve to death while surrounded by tonnes of food? How long does a decapitated head stay "alive"? What human artefacts can be seen with

the naked eye from the International Space Station? Who is Bertha Benz and how did her first car trip revolutionise how we use petrol today? Finally, monitor your breathing and learn why whales are so big, why oral histories are surprisingly accurate and try the five tried-and-tested steps to becoming a wellness guru. *House of Karls* May 14 2022 In the ruthless pursuit of scientific fact, there is no candidate

more formidable than Dr Karl Kruszelnicki. Power hungry for experimentation, data manipulation and outlandish science propaganda, Dr Karl is Australia's incumbent President of Science. In House of Karls, he addresses a range of issues and questions: how Politics and Greed are dirtying the purity of Science and why the world's most expensive book costs more than \$23 million dollars, but only \$4 to post. How real is the Five Second Rule with food? Why does a frog in milk stop it from souring? Why did the Nazis steal the only Space Buddha? Gold may bring power, but

how did it get from an exploding star to a gum tree? Why are children smarter than their parents? Why is bank robbery a terrible economic decision, and what are the surprising origins of the 'selfie'? Did you know that the Government knows of a cancer cure and it has 75,000 pieces of Big Data on you ...Vote #1 @doctorkarl. Knowledge is Power. *Dinosaurs Aren't Dead* Dec 09 2021 From the Master Geek and National Living Treasure "Dr Karl is Australia's incumbent President of Science" The Age "There's no topic on which Dr Karl does not have an interestingly expressed opinion"

The Weekly Review From things that fall from the sky (great green globs!) to the birth of the moon, exploding stars, wooden spaceships, life in deep space, this bird's eye view of the universe takes us all the way to the end of the solar system and back again. Dr Karl is one of the most dynamic and enthusiastic popular scientists in Australia. His adult titles are anecdotal, fascinating and informative. His quirky and contagiously accessible take on science and the amazing world around us is now available for children aged 8 years and over. The first title, *Dinosaurs Aren't Dead*,

exposes an amazing truth: while practically all of the many species of dinosaurs died out spectacularly 65 million years ago - one species did survive, and still lives today - the birds.

Game of Knowns

Oct 07 2021 There are Known Knowns, Known Unknowns, and Unknown Unknowns. And then there is Dr Karl. "Dr Karl is Australia's incumbent President of Science" The Age "There's no topic on which Dr Karl does not have an interestingly expressed opinion" The Weekly Review The inimitable Dr Karl, Master Geek and National Living Treasure, reigns once more in his

Dynasty of 34 Science Books with scintillating science scenarios, techie tales and tasty morsels to sate even the most haemoglobin-thirsty of his army of followers. In Game of Knowns, he divulges why psychopaths make good kings, how smartphones dumb down our conversations, why the left side of your face is the most attractive, how the female worker bee gets a raw deal and why we drink beer faster when it is served in a curved glass. He discloses the amazing opportunities that 3D Printing will bring, the magic of hoverboards, solemnly shares why dark matter matters, and spills

the scientific basis of wealth distribution. Thereby Science is decreed to be the only true ruler of the kingdom, and there is none better to claim the Throne than Australia's most trusted and knowledge-thirsty scientist - Dr Karl. Fans of Adam Spencer will love Game of Knowns. This is a specially formatted fixed layout ebook that retains the look and feel of the print book.

The Skeptic's Guide to the Paranormal

Dec 29 2020 This book offers explanations for twenty-seven phenomena that appear to defy known science, including ghosts and poltergeists, walking over hot

coals, telepathic spoonbending, yogic levitation, and many others.

Great Mythconceptions

Jan 22 2023

Presents a collection of facts and discovers about some of science's greatest myths.

Dr Karl's Random Road Trip Through Science

Sep 18 2022 In this, his 45th book, Dr Karl goes full colour, with brilliant and funny illustrations to match his dress sense. So take a technicolour trip through science with the intrepid Dr Karl, Australia's favourite science guru. Q: HOW MANY DR KARL BOOKS ARE THERE IN THE UNIVERSE? A: MORE THAN A

MILLION! Dr Karl is on a mission to track down Awe and Wonder in the Universe. Why do wombats poo cubes? What nearly destroyed humanity on Halloween 2015? How do you use an incinerating toilet? Find out why we've sent a spacecraft with Dr Karl's name on it to kiss the Sun, whether cannibalism is nutritious, and the answer to the Biggeset Question of All - why does spaghetti always break into three pieces? Plus a whole lot more. So strap in and get ready for a random ride through the Universe. Who knows where you'll end up! Fidgeting Fat, Exploding Meat &

Gobbling Whirly Birds and Other Delicious Science Moments Jul 04 2021 Do you wonder about these and other earth-shaking scientific questions? Do our ears get bigger as we grow older? Can you really lose weight just by fidgeting? Why do cats survive 32-story falls better than 8-story ones? Now you can find the fascinating answers to these and other profound science questions . . . all in one highly entertaining, fact-packed volume! Popular international science author Karl Kruszelnicki will dazzle and delight you with his latest weird-science compendium, Fidgeting Fat,

Exploding Meat & Gobbling Whirly Birds. A perfect blend of solid research and wacky humor, *Fidgeting Fat, Exploding Meat & Gobbling Whirly Birds* is crammed with captivating and obscure facts. You'll discover which animals can literally move like wheels . . . learn the original version of Murphy's Law, and why it works . . . find out why toast falls butter-side down . . . and meet people who are allergic to water. You'll explore the world of cheetahs (are they really that fast?), explosives (can they really tenderize meat?), Nostradamus (did he really predict the future—or just the past?), and

more! Be a hit at parties! Amaze your boss! Surprise your houseguests! But mostly, have fun devouring this collection of amazing—but true—scientific knowledge.

Dr Karl's Short Back & Science

Oct 19 2022 Lean back and settle in for cutting-edge scientific snippets from the trend-setting Dr Karl Kruszelnicki. In *Short Back & Science*, Dr Karl combs through some of the greatest scientific conundrums of our age, such as what is killing half the bacteria on Earth every two days and why don't mole rats get cancer? Why would anyone pay \$40 million for a cup of tea, and how

did a toilet seat help to end the First World War? Are bananas really slippery, radioactive and loaded with potassium? What do clouds weigh? And why are there scientists running around naked in the Antarctic? Brushing aside any hype about coconuts and antioxidants, there is no one better to trim down to the facts than Australia's most trusted scientist, Dr Karl. This is a specially formatted fixed layout ebook that retains the look and feel of the print book.

[A Short](#)

[Introduction to Climate Change](#)

Sep 25 2020 This book provides a comprehensive, balanced and reader-friendly account of the developments in climate science over the past 250 years.

Deadly Science

Jan 18 2020 In this book, students investigate the different types of adaptations that animals might have to help them survive and thrive in their particular environment, and then explore a range of key Australian habitats, from deserts to rainforests.

Evergreen Jun 03 2021 In this wildly rich memoir, a

director at some of the world's finest botanic gardens - Sydney, Kew and Melbourne - suggests such places are a cure for the world's ills.

Dr Karl's Big Book of Science, Stuff and Nonsense

Aug 17 2022 This book is bigger than the BIG BANG! Stuffed with things to read, draw, puzzle, invent, order, unscramble, create, write, decode, code, make, match up, mix up ... It's the wonderful world of me! - Dr Karl

Adam Spencer's

Maths 101 Nov 27 2020 Maths explained for number challenged parents and children

Dr Karl's Little

Book of Trivia 101

Nov 20 2022 Why

do stars seem to twinkle? Where do all the teaspoons go? Why is the Giant Panda so paradoxical? Why does dark matter matter? The world around (and inside) us is completely astonishing. Dr Karl Kruszelnicki, the most esteemed science communicator in Australia, has chosen 101 fascinating facts from his bestselling books to delight and intrigue you. Taking a microscope to everyday science he gives us insights into the surprising origins of the "selfie", the rise and rise of 3D printing, how a nit is hatched by massive amounts of farting, why humans are

basically fat doughnuts, and how you can stop milk from spoiling by dropping a Russian brown frog into it. These are things you need to know. These are things you don't even know you need to know. A riveting ride through the extraordinary world of science.

House of Karls

Dec 21 2022 In the ruthless pursuit of scientific fact, there is no candidate more formidable than Dr Karl Kruszelnicki, Master Geek and National Living Treasure. "There's no topic on which Dr Karl does not have an interestingly expressed opinion" The Weekly Review "Guaranteed good

read" The Age In House of Karls, Dr Karl addresses a range of issues and questions: how Politics and Greed are dirtying the purity of Science and why the world's most expensive book costs more than \$23 million dollars, but only \$4 to post. How real is the Five Second Rule with food? Why does a frog in milk stop it from souring? Why did the Nazis steal the only Space Buddha? Gold may bring power, but how did it get from an exploding star to a gum tree? Why are children smarter than their parents? Why is bank robbery a terrible economic decision, and what are the surprising origins of the 'selfie'? Did

you know that the Government knows of a cancer cure and it has 75,000 pieces of Big Data on you ... Vote #1 @doctorkarl. Fans of Adam Spencer will love House of Karls. This is a specially formatted fixed layout ebook that retains the look and feel of the print book.

[Karl, the Universe and Everything](#) Nov 08 2021 Grab your towel and hitchhike across the galaxy with Australia's most popular scientist Dr Karl Kruszelnicki. Learn about Dr Karl, the universe and everything, and discover how air-conditioning is sexist, how you can kill a spinning hard drive by shouting at it and how space junk is threatening

our future capabilities for space travel. Could there be life on one of Saturn's moons? How much power could you collect from all the lightning on Earth? Why do books have book-smell? Why is 10 per cent of the Earth's land area prone to sinkholes? Why are some people chronically late? What would happen if the Earth stopped spinning? Why do most people hardly remember anything from the first half-a-dozen years of their life? How close are we to the Artificial Uterus? Why do some songs turn into "earworms" and stick inside your brain? Why does your hotel room access card get wiped so easily?

And is your home WiFi really spying on you?

The Quest Diaries of Max Crack

Nov 15 2019 Hi everyone! I'm Max Crack and this awesome book is all about me and my quests and my best friend Frankie! Buried treasure, new school, doodles, peanut butter and honey toast, best friends, horrible blobs, mysteries, Meddlyslop, spelling bees (hard words, harder words), more doodles, comics, World War Undies ... this book has it ALL. This is a specially formatted fixed-layout ebook that retains the look and feel of the print book.

Doctor Karl's Australia Oct 27

2020 Australia's best-loved scientist is back with a revised and - by popular demand - digital edition of Doctor Karl's Australia: Great Australian Facts & Firsts. Doctor Karl's Australia: Great Australian Facts & Firsts brings together hundreds of scintillating, amazing and frequently funny stories about Aussie ingenuity and inventiveness, such as what the periscope did for the rifles at Gallipoli, how the bionic ear was invented, why dung beetles got Meals on Wheels, who really came up with the pavlova, and how sharks - yes, sharks - started a tyre business! Not only that, Xoum's

new eBook edition includes gorgeous all-new illustrations by celebrity scribbler Roy Chen and brand-new stories about the amazing exploits of the Australian submarine AE2 plus General Monash's inspired use of tanks in World War I. Doctor Karl's Australia: Great Australian Facts & Firsts is a must-read, all-ages celebration of 'Strayan science and technology, landscape and people, and the erratic path of invention and discovery in our magnificent wide brown land.

Why Aren't We Dead Yet? Jun 22 2020

SHORTLISTED FOR THE 2015 BRAGG UNSW

PRESS PRIZE FOR SCIENCE WRITING

Disease — specifically infectious disease — is what eventually kills the overwhelming majority of us. In fact, it's amazing that it doesn't get us sooner: we fight off millions of disease-causing germs every day. So how come we're not dead yet? In this lively and accessible book, Idan Ben-Barak tells us why. He explores the immune system and what keeps it running, how germs are destroyed, and why we develop immunities to certain disease-causing agents. He also examines the role of antibiotics and vaccines, and looks at what the

future holds for our collective chances of not being dead. This is entertaining and thoughtful science writing to inspire the student interested in a career in medicine or immunology, or to inform the reader who just wants to understand more about their body while having a laugh along the way. PRAISE FOR IDAN BEN-BARAK '[F]riendly and engaging ... accessible to anyone who's curious about the mechanics of the human body.' The Age

Hung Like an Argentine Duck

Jan 30 2021 We all know about the birds and the bees, but what about the ancient placoderm

fishes and the dinosaurs? The history of sex is as old as life itself-and as complicated and mysterious. And despite centuries of study there is always more to know. In 2008, paleontologist John A. Long and a team of researchers revealed their discovery of a placoderm fish fossil, known as "the mother fish," which at 380 million years old revealed the oldest vertebrate embryo—the earliest known example of internal fertilization. As Long explains, this find led to the reexamination of countless fish fossils and the discovery of previously undetected embryos. As a

result, placoderms are now considered to be the first species to have had intimate sexual reproduction or sex as we know it-sort of. Inspired by this incredible find, Long began a quest to uncover the paleontological and evolutionary history of copulation and insemination. In *Hung Like An Argentine Duck*, he takes readers on an entertaining and lively tour through the sex lives of ancient fish and exposes the unusual mating habits of arthropods, tortoises, and even a well-endowed (16.5 inches!) Argentine Duck. Long discusses these significant discoveries alongside what we know about

reproductive biology and evolutionary theory, using the fossil record to provide a provocative account of prehistoric sex. *Hung Like An Argentine Duck* also explores fascinating revelations about animal reproduction, from homosexual penguins to monogamous seahorses to the difficulties of dinosaur romance and how sexual organs in ancient shark-like fishes actually relate to our own sexual anatomy. *Hung Like An Argentine Duck* is Long's own story of what it's like to be a part of a discovery that rewrites evolutionary history as well as an

absolutely rollicking guide to sex throughout the ages. "John Long is renowned as the discoverer of the earliest evidence for internal fertilisation. In a book encompassing 380 million years of sexual evolution, he lays the full significance of his discoveries in fascinating context." - *tim Flannery* "You are now holding a compromise between a book that you should carry hidden inside an opaque bag, and a sober respectable scientific treatise. It's a deliciously written account of the evolution of sex, in all of its bizarre manifestations. Read, blush, and enjoy!" - *Jared Diamond*, Professor

of Geography at UCLA, Pulitzer-Prize-winning author of *Guns, Germs, and Steel* "I shall never feel the same about ducks again. Or fish. this is first class science told with brilliance and flair. Read and be astounded." - Robyn Williams 'John Long breaks new ground in our understanding of the origins of sex as it is written in the fossil record. Using well-preserved specimens he has worked on for more than two decades, he reconstructs a detailed 400 million year history in which survival of not only the best, but sexiest, continues to dominate all species, including humans' - Carmelo Amalfi, science

writer.

The Doctor Apr 13 2022 THE TIME(LESS) LORD OF SCIENCE, DR KARL KRUSZELNICKI, IS BACK. No need for the Tardis when you can mind travel through "wibbly-wobbly" theories of Time Travel, how alcohol makes you speak louder, how to tell what part of a movie the audience is watching without looking, and why Americans are no longer the tallest people on Earth. What will the discovery of Gravitational Waves do for you? Why do you sleep badly in an unfamiliar bed? Why should you exercise before breakfast (not after) to stop weight piling on? Is Bitcoin

the currency of the future? What connects God, caffeine and chocolate? How does streaming a video for an hour use more electricity than running a fridge for a week? What are the secrets of immortal jellyfish and vampires? Are smoothies good for you? And just what is a "vomitorium"? The Doctor lays it all down - without resorting to a Sonic Screwdriver. This is a specially formatted fixed layout ebook that retains the look and feel of the print book.
Dr Karl's Surfing Safari through Science May 22 2020 Australia's favourite science guru returns with a new haul of

extraordinary stories from our incredible Universe -- includes pop-up Dr Karl holograms! Dr Karl is surfing the Universe for all that's gnarly, awesome, weird and wonderful. Why is sharpening a pencil in space a risky business? What makes a sunset red and not blue? How far would the Earth's viruses reach if you laid them end to end? Which animal grows an anus every time it needs to poo? Find out how spiders can fly and count, whether 5G networks are safe, why we're running out of sand, and the answer to the Question on Everyone's Lips - how to make the best coffee. Plus loads more,

including pop-up Karl holograms! So take a surfing safari with Dr Karl and get ready to Hang Ten -- or wipe out.

The Great Eskimo Vocabulary Hoax and Other

Irreverent Essays on the Study of

Language Aug 25 2020 How reliable are all those stories about the number of Eskimo words for snow? How can lamps, flags, and parrots be libelous? These and many other odd questions are typical topics in this collection of essays that present and occasionally zany, often wry, but always fascinating look at language and the people who study it.

Brain Food Jan 10 2022 National Living Treasure Dr Karl places

everyday science under the microscope; gives an insight into your insides; considers the elements of life; talks popcorn and pop stars, missing microbes and teaspoons; and ponders the paradoxical panda all in the name of edifying entertainment. Featuring 16 squared pages crammed full of glorious words and pictures, Brain Food will make you laugh, make you think AND best of all, make youse smarterer!

Dr Karl's Little Book of Climate Change Science

Jul 16 2022

Australia's favourite science guru explains the facts about climate change -- and how we can fix it How

do Greenhouse Gas molecules shimmy and shake to trap 400,000 Hiroshima atom bombs' worth of the Sun's heat each day? Who did the early research into Climate Change and then spent billions trying to cover it up? What's the Hockey Stick Graph and why is it so important? How did Climate Change tip the Earth off its axis? Why was Sydney the hottest place on Earth on 4 January 2020? How can we move to zero and even negative emissions? How can kelp help? When it comes to long-haul transport, why is hydrogen the way to go? And much more! Now, in this never dull, easy-to-understand guide Dr Karl

explains the science of climate change and how we can fix it. (We can!) [Never Mind the Bullocks, Here's the Science](#) Sep 06 2021 More whacky, fun facts with everyone's favourite scientist Dr Karl has taken on Santa Claus, atom bombs, 'friendly' dolphins and 'killer' whales, meteors, black holes, string theory and camel's humps. In his 27 mega-selling books, he demolishes myths, tells readers how to spot bogus science and advises readers to be wise, sceptical and to always challenge authority. In his 28th book he continues his crusade to keep the world a rational place by answering vital questions like 'Are white cats

deaf?' and 'Will lemon juice make you slimmer?' **Dr Rip's Essential Beach Book** Apr 20 2020 Many of us live near the beach, and many more visit the beach on holidays. [Curious and Curiouser](#) Mar 20 2020 From the Master Geek and National Living Treasure "Dr Karl is Australia's incumbent President of Science" The Age "There's no topic on which Dr Karl does not have an interestingly expressed opinion" The Weekly Review "It is a great nuisance that knowledge can only be acquired by hard work." W. Somerset Maugham Are cooked mussels safe ONLY if they

are open? Why does alcohol make the opposite sex more attractive? Why does washing your hands ease your conscience, make it easier to live with hard decisions, and make you more tolerant? Why does lightning strike the same place twice (and more)? Do babies get more illnesses when they are 'teething'? What is the science behind people spontaneously bursting into flames? And what's more hygienic - an air blower or a paper towel? Fans of Adam Spencer will love Curious and Curiouser.

Responsible Leadership and Ethical Decision-Making Dec 17 2019 The volume brings to life a

number of the conference themes including corporate social responsibility, culture, academic integrity, vulnerability, health, military ethics, education, leadership, sustainability and philosophy and addresses concerns of many leading applied ethicists.

[Big Fat Myths](#) Jul 24 2020 When you lose weight, where does the fat go? Most people assume it turns into heat and energy, but Albert Einstein showed us that diets would be devastating if this were true. The correct answer is that fat is converted to carbon dioxide and water. Energy is released, but no mass is created or

destroyed. This was known when the First Fleet sailed into Sydney and yet it took two more centuries for Ruben Meerman to show that precisely 8.4 kilograms out of every 10 kilograms of fat are exhaled, while the remaining 1.6 kilograms become crystal clear water. His calculations were published in The British Medical Journal in December 2014. Meerman begins this diet myth-busting book by reminding us what we already know: that human beings are carbon-based, oxygen-dependent life forms. Where do the carbon atoms we exhale come from? Carbohydrates are hydrated carbon,

and so are fats, whether they're saturated or not. Eat less, and you'll exhale the excess carbon stored under your skin. Big Fat Myths lifts the veil on weight loss by tracing every atom you eat into and out of your body. Diet myths and wellness nonsense topple like dominoes along the way, restoring your confidence in common sense and the age-old wisdom that to lose weight, you simply need to eat less and move more.

50 Shades of Grey Matter Aug 05 2021 Welcome to the wonderful world of Doctor Karl: where oddities are embraced, facts reign supreme, curiosity is king and brightly coloured

shirts are compulsory! In his brand new book, our much beloved and National Living Treasure Doctor Karl Kruszelnicki applies his trademark straight-talkin'-no-high-falutin' scientific sense to a brand new range of Big Questions that you never knew you even wanted to ask, but now desperately need to know the answers to. Have you ever walked into a room and immediately forgotten the reason you're there? A solid thought convinced your legs to move, but by the time you reach your destination, you realise the thought has abandoned you en route. No, it's not dementia. It's

the doorway. Impress your friends (and potential dates) by being able to answer such questions as:- Why is the sky blue? - Why is it dark at night?- Why does lunacy erupt under a full moon?- What's the truth about spinach and Popeye? In this ever-changing, fast-paced and sometimes crazy world, few things are certain. But what is certain is that Dr Karl is here to help us battle our way through half-baked scientific myths and rumours, so that we may emerge smarter, stronger and viewing the world with more wonder than ever before. The Naked Scientist Feb 17 2020 Is it

possible to tell how happy a dog is by watching the way it wags its tail? Why is the Eiffel Tower 15 centimetres taller in mid-summer than it is in mid-winter? Does sound travel faster in water or air? Can one really read other people like a book? Why do so many people hate eating their greens? Firmly in the tradition of DOES ANYTHING EAT WASPS? new scientific kid on the block Chris Smith - aka THE NAKED SCIENTIST - explores present-day predicaments and tomorrow's technologies, from the most surprising facts to the most innovative new inventions, from staggering stats to serious

developments that will transform the world around us. In this fascinating book, top scientist Chris Smith uses his wit and charm to lift the lid on the curious, crazy and compelling - and answer those questions you never thought to ask. Why Do Tigers Have Whiskers? Feb 28 2021 Do sharks sneeze? Do butterflies remember being caterpillars? Why don't cats wear shoes? Children have an insatiable curiosity for the world around them, and life can be an endless source of fascination for young minds. But do you have all the answers? And are they actually correct? Maybe you need to ask an

expert. Adapted from The Conversation's highly successful Curious Kids online column, Why Do Tigers Have Whiskers? is the first book in a series exploring some of life's most pressing questions, submitted by children and answered by leading experts in each field.

It Ain't

Necessarily So...

Bro Mar 12 2022 In the next book in Dr Karl's mega-selling science series, Australia's favourite scientist answers more curly questions about life, the universe and everything; questions such as Are virgin births possible? (they are) Will a black hole suck you in? (it

won't) Is the most radioactive device in our homes the microwave? (it's not, it's the smoke detector) No-one conveys the excitement and wonder of science quite like Dr Karl and this, his twenty-fifth book, takes us on another thoroughly entertaining exploration of the world around us. If you like your science fun and unpredictable, don't miss this new addition to the Dr Karl library.

Science is Golden

May 02 2021 Gold, gold, gold for Australia's mega-selling scientist's 27th book... 'Nullius in verba', the Royal Society's motto, roughly translated, means 'take nobody's word for it'. Why not do the experiment for yourself and see the reality of nature. Don't trust authority - trust nature. Does cranberry juice cure urinary tract infections? Is the hookah really a safer way to smoke? Will the

Large Hadron Collider destroy the Earth and the Universe? Is the purpose of the peacock's tail to attract females? And in the unlikely event of a plane crash, are some seats safer than others? the human hand has 27 bones; Uranus has 27 moons; 27 is a perfect cube, being $3 \times 3 \times 3$; and in this, Dr Karl's 27th book, he takes us on another exploration of the dazzling world of science.
