This book reports on cutting-edge design methods and tools in industrial engineering, advanced findings in mechanics and material science, and relevant technological applications. Topics span from geometric modelling tools to applications of virtual/augmented reality, from interactive design to ergonomics, human factors research and reverse engineering. Further topics include integrated design and optimization methods, as well as experimental validation techniques for product, processes and systems development, such as additive manufacturing technologies. This book is based on the International Conference on Design Tools and Methods in Industrial Engineering, ADM 2019, held on September 9–10, 2019, in Modena, Italy, and organized by the Italian Association of Design Methods and Tools for Industrial Engineering, and the Department of Engineering “Enzo Ferrari” of the University of Modena and Reggio Emilia, Italy. It provides academics and professionals with a timely overview and extensive information on trends and technologies in industrial design and manufacturing. "The Beijing-Islamabad axis plays a central role in Asia's geopolitics, from India's rise to the prospects for a post-American Afghanistan, from the threat of nuclear terrorism to the continent's new map of mines, ports and pipelines. China is Pakistan's great economic hope and its most trusted military partner; Pakistan is the battleground for China's encounters with Islamic militancy and the heart of its efforts to counter-balance the emerging US-India partnership. For decades, each country has been the other's only 'all-weather' friend. Yet the relationship is still little understood. The wildest claims about it are widely believed, while many of its most dramatic developments are hidden from the public eye. This book sets out the recent history of Sino-Pakistani ties and their ramifications for the West, for India, for Afghanistan, and for Asia as a whole. It tells the stories behind some of its most sensitive aspects, including Beijing's support for Pakistan's nuclear program, China's dealings with the Taliban, and the Chinese military's planning for crises in Pakistan. It describes a relationship increasingly shaped by Pakistan's internal strife, and the dilemmas China faces between the need for regional stability and the imperative for strategic competition with India and the USA."--Amazon.com. This volume discusses how different geographical spaces can enhance or hinder the capacity of a variety of organizational settings to achieve economic value creation in the pursuit of sustainable regional development. In order to provide the most comprehensive picture of new sources of value creation for sustainable transitions, the book collects contributions that tackle this issue from a variety of perspectives, and adopts a systemic approach where macro, meso and micro-levels of analysis are intertwined in three sections. This multidisciplinary and interdisciplinary approach comes from scholars operating in the fields of planning, economic geography, social entrepreneurship and organizational management. The first section of the book adopts a macro-level approach linking sustainability to the regional development theme, and addresses how organizations work between different social interests to produce outcomes not previously realized. The second section of the book focuses on the spatial dimensions of sustainable development, with particular clusters, industrial districts and regions considered as relevant units of analysis (meso-level analysis). The third section of the book is dedicated to a micro-level approach, illustrating how to drive social entrepreneurship activities, which are based upon sustainable business models centered in the creation of a shared value. The book is geared towards scholars working on sustainable development issues intersecting the disciplines of regional studies, economic geography and management, and will appeal to geographers and researchers in economic development, business innovation, and sustainability transitions. Some years ago the Chinese painted a canvas for themselves, and made all its colours come true. National income multiplied rapidly over thirty years, and millions of lives in the country improved, as China shot dizzily to the second slot in world economy. As growth now slows in China, the world waits for the giant to stumble. The never-say-die Chinese are however busy transforming their economy yet again - in surprising and significant ways - poised to catapult themselves to the next stage of development. The change is slow, seemingly imperceptible, but relentless, unmistakable and innovative.... China: Behind the Miracle reveals the many dimensions of the country's growth phenomenon. The book focuses on telling a simple tale of the Chinese economy, sharing extraordinary models of growth and economic change, while helping the reader develop an insight into critical issues. Investigating the connections between multiculturalism, minorities, citizenship, and democracy in North Africa, this book argues that multiculturalism in this region- and in the Arab world at large - has reached a significant level in terms of scale and importance. In the rest of the world, there has been a trend - albeit a contested one - toward a greater recognition of minority rights. The Arab world however, particularly North Africa, seems to be an exception to this trend, as Arab states continue to promote highly unitary and homogenizing ideas of nationhood and state unity, whilst discouraging, or even forbidding, minority political mobilization. The central theoretical premise of this book is that North Africa is a multicultural region, where culture is inherently linked to politics, religion, gender, and society, and a place where democracy is gradually taking root despite many political and economic hurdles. Addressing the lacuna in literature on this issue, this book opens new avenues of thought and research on diversity, linking policy based on cultural difference to democratic culture and to social justice. Multiculturalism and Democracy in North Africa will be of use to students and researchers with an interest in Sociology, Cultural Studies, and Political Science more broadly. Whilst the Chinese Communist Party is one of the most powerful political institutions in the world, it is also one of the least understood, due to the party's secrecy and tight control over the archives, the press and the Internet. Having governed the People's Republic of China for nearly 70 years though, much interest remains into how this quintessentially Leninist party governs one-fifth of the world and runs the world's second-largest economy. The Routledge Handbook of the Chinese Communist Party gives a comprehensive and multi-faceted picture of the party's traditions and values – as well as its efforts to stay relevant in the twenty-first century. It uses a wealth of contemporary data and qualitative analysis to explore the intriguing relationship between the party on the one hand, and the government, the legal and judicial establishment and the armed forces, on the other. Tracing the influence of Marx, Engels, Lenin and Stalin, as well as Mao Zedong, on contemporary leaders ranging from Deng Xiaoping and Jiang Zemin to Hu Jintao and Xi Jinping, the sections cover: the party's history and traditions; how the party works and seeks to remain relevant; major policy arenas; the CCP in the twenty-first century. The Routledge Handbook of the Chinese Communist Party will be of interest to students and scholars of Chinese Politics, Asian Politics, Political Parties and International Relations. China's increasing prominence on the global stage has caused consternation and controversy among Western thinkers, especially since the financial crisis of 2008. But what do Chinese intellectuals themselves have to say about their country's newfound influence and power? *Voices from the Chinese Century* brings together a selection of essays from representative leading thinkers that open a window into public debate in China today on fundamental questions of China and the world—past, present, and future. The voices in this volume include figures from each of China's main intellectual clusters: liberals, the New Left, and New Confucians. In genres from scholarly analyses to social media posts, often using Party-approved language that hides indirect criticism, these essayists offer a wide range of perspectives on how to understand China's history and its place in the twenty-first-century world. They explore questions such as the relationship of political and economic reforms; the distinctiveness of China's history and what to take from its traditions; what can or should be learned from the West; and how China fits into today's eruption of populist anger and challenges to the global order. The fifteen original translations in this volume not only offer insight into contemporary China but also prompt us to ask what Chinese intellectuals might have to teach Europe and North America about the world's most pressing problems. Exam Board: Cambridge International Examinations Collins is working with Cambridge International Examinations towards endorsement of this title. \* Set homework easily or offer extra support where needed with a clear correspondence between the Workbook and Student Book. \* Following the skills-building chapter structure of Student Book, the Workbook provides additional practice of the fundamental reading, writing and speaking and listening skills, covering teaching points in more depth and with more scaffolding where appropriate. \* Practice tasks for all the exam-question styles help students to build their writing stamina and fluency for all the writing forms and purposes required by the syllabus. \* The write-in format means students can review and revisit their learning, providing a useful reference for revision. \* Explanations and activities have been designed to be used by students working individually, without teacher support, if desired. deficit is a principal concern in East Asia, the book attempts to suggest ways to enhance confidence in certain key areas such as disputes in East and South China Seas, maritime CBMs, impact of economic interdependence on security, and issues concerning identity and values in Asian thinking. This open-access book presents cutting-edge research on securitization and democratic development in the OSCE Region. Gathering contributions by practitioners and researchers from various disciplines, it presents case studies and highlights recent activities of proactive engagement in democratic institution-building and responding to security threats from the Balkans to Central Asia. The volume is divided into three parts, the first of which focuses on security-related matters, armed conflicts, minorities, and women's safety, as well as the roles that civil society, foreign governments, social media, and external donors play in this area. These contributions illustrate how the OSCE's informal approach to peace, security, and securitization as norm entrepreneur is closely linked to the level of democracy among its member states. The second part presents a special section on the political implications of China's Belt and Road Initiative (BRI), assessing the impact of this infrastructural program on the levels of democracy and/or autocracy in Eurasia. The third part consists of short chapters outlining future research and debates. The book will appeal to students and scholars of international relations, security studies, and the human rights-politics nexus. This is the 2022 instalment in a series of books released by the OSCE Academy in Bishkek. The OSCE works to promote Minority Protection, Security, Democratic Development and Human Rights, guided by the Office for Democratic Institutions and Human Rights (ODIHR), and to enhance securitization and development policies in Eurasia, Europe, Central Asia and North America. Since being founded in 1993, the OSCE and its agencies and departments have attracted a wealth of academic research in various fields and disciplines, ranging from economic development and election monitoring to enhancing global principles of human rights and securitization. A General History of Horology describes instruments used for the finding and measurement of time from Antiquity to the 21st century. In geographical scope it ranges from East Asia to the Americas. The instruments described are set in their technical and social contexts, and there is also discussion of the literature, the historiography and the collecting of the subject. The book features the use of case studies to represent larger topics that cannot be completely covered in a single book. The international body of authors have endeavoured to offer a fully world-wide survey accessible to students, historians, collectors, and the general reader, based on a firm understanding of the technical basis of the subject. At the same time as the work offers a synthesis of current knowledge of the subject, it also incorporates the results of some fundamental, new and original research.
