Conceptual and Contextual Perspectives on the Modern Law of Treaties Jun 23 2020 In recent

years there has been a flourishing body of work on the Law of Treaties, crucial for all fields within international law. However, scholarship on modern treaty law falls into two distinct strands which have not previously been effectively synthesized. One concerns the investigation of concepts which are fundamental to or inherent in the law of treaties generally - such as consent, object and purpose, breach of obligation and provisional application - while the other focuses upon the application of treaties and of treaty law in particular substantive (e.g. human rights, international humanitarian law, investment protection, environmental regulation) or institutional contexts (including the Security Council, the World Health Organization, the International Labour Organization and the World Trade Organization). This volume represents the culmination of a series of collaborative explorations by leading experts into the operation, development and effectiveness of the modern law of treaties, as viewed through these contrasting perspectives.

The Reasonable Robot Dec 30 2020 Argues that treating people and artificial intelligence differently under the law results in unexpected and harmful outcomes for social welfare.

Egypt Mar 01 2021 Egypt is one of the few great empires of antiquity that exists today as a nation state. Despite its extraordinary record of national endurance, the pressures to which Egypt currently is subjected and which are bound to

intensify are already straining the ties that hold its political community together, while rendering ever more difficult the task of governing it. In this timely book, leading expert on Egyptian affairs Robert Springborg explains how a country with such a long and impressive history has now arrived at this parlous condition. As Egyptians become steadily more divided by class, religion, region, ethnicity, gender and contrasting views of how, by whom and for what purposes they should be governed, so their rulers become ever more fearful, repressive and unrepresentative. Caught in a downward spiral in which poor governance is both cause and consequence, Egypt is facing a future so uncertain that it could end up resembling neighboring countries that have collapsed under similar loads. The Egyptian "hot spot", Springborg argues, is destined to become steadily hotter, with ominous implications for its peoples, the Middle East and North Africa, and the wider world.

Power in World Politics Apr 02 2021 This book engages the view that students of International Relations need to break with the habit of defining power in terms of military capabilities of states. Featuring contributions from both upcoming and distinguished scholars, including Steven Lukes, Joseph Nye, and Stefano Guzzini, it explores the nature and location of 'power' in international politics through a variety of conceptual lenses. With a particular focus on the

phenomenon of 'soft' power and different types of actors in a globalizing world, fifteen chapters assess the meaning of 'power' from the perspectives of realism, constructivism, global governance, and development studies, presenting discussions ranging from conceptual to practical oriented analyses. Power in World Politics attempts to broaden theoretical horizons to enrich our understanding of the distribution of power in world politics, thereby also contributing to the discovery and analysis of new political spaces. This is essential reading for all advanced students and scholars of international relations.

Advanced Natural Gas Engineering Feb 18 2020
Natural gas is playing an increasing role in meeting world energy demands because of its abundance, versatility, and its clean burning nature. As a result, lots of new gas exploration, field development and production activities are under way, especially in places where natural gas until recently was labeled as "stranded". Because a significant portion of natural gas reserves worldwide are located across bodies of water, gas transportation in the form of LNG or CNG becomes an issue as well. Finally natural gas is viewed in comparison to the recently touted alternatives. Therefore, there is a need to have a book covering all the unique aspects and challenges related to natural gas from the upstream to midstream and downstream. All these new issues have not been addressed in depth in

any existing book. To bridge the gap, Xiuli Wang and Michael Economides have written a new book called *Advanced Natural Gas Engineering*. This book will serve as a reference for all engineers and professionals in the energy business. It can also be a textbook for students in petroleum and chemical engineering curricula and in training departments for a large group of companies.

Making Eye Health a Population Health Imperative

Mar 21 2020 The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. Making Eye Health a Population Health Imperative: Vision for Tomorrow proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of

improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.

**Conflict of Interest in Medical Research,
Education, and Practice** Jun 04 2021

Collaborations of physicians and researchers with industry can provide valuable benefits to society, particularly in the translation of basic scientific discoveries to new therapies and products. Recent reports and news stories have, however, documented disturbing examples of relationships and practices that put at risk the integrity of medical research, the objectivity of professional education, the quality of patient care, the soundness of clinical practice guidelines, and the public's trust in medicine. **Conflict of Interest in Medical Research, Education, and Practice** provides a comprehensive look at conflict of interest in medicine. It offers principles to inform the design of policies to identify, limit, and manage conflicts of interest without damaging constructive collaboration with industry. It calls for both short-term actions and long-term commitments by institutions and individuals, including leaders of academic medical centers, professional societies, patient advocacy groups, government agencies, and drug, device, and pharmaceutical companies. Failure of the medical community to take convincing action on conflicts of interest invites additional legislative or regulatory measures that may be overly broad or unduly burdensome. **Conflict of Interest in Medical**

Research, Education, and Practice makes several recommendations for strengthening conflict of interest policies and curbing relationships that create risks with little benefit. The book will serve as an invaluable resource for individuals and organizations committed to high ethical standards in all realms of medicine.

Jase May 03 2021 CarlyDicen que nunca debes juzgar a un libro por su portada, pero, como ávida lectora de 'ese tipo de libros'? y como miembro del club de lectura de mi mamá, es difícil no hacerlo. A lo que me refiero es, ¿quién

puede culparme por desear a un encantador chico malo, con tatuajes y piercings, ojos color chocolate y toda esa sexy melena? La manera en que me mira hace que me moje tanto como la costa de Jersey. Simplemente es deseo a primera vista. Solo hay algo que me detiene de arrojar mi precaución por los vientos y permitirle devorarme de la misma forma en que hacen los héroes con las mujeres en los libros que leo. Soy virgen. Vale, hay dos cosas que me detienen: también es el mejor amigo de mi primo. Jase He visto esa mirada cientos de veces. Me lo está pidiendo a gritos. Quizás no con palabras, pero sí con la forma en que me mira. Quiero devorarme entera a la rubiecita sexy de hermosos ojos azules, tetas perfectas y culo respingon. Ella también quiere que lo haga. El único problema es que es la prima de mi mejor amigo y él sabe que yo no soy ningún príncipe Encantador que cabalgará sobre un caballo blanco para rescatar a la doncella. He trabajado duro para mantener la reputación de ser alguien sin ataduras, un chico más al estilo príncipe Albert. Pero ella está haciendo que todo sea más difícil.

Scandalous Scotsman Aug 18 2022 One trip down the stairs, caused by a lone Lego, while wrapped in a towel, spewing a plethora of profanities, and my cell phone went flying. I landed on my ass, and then the ER. Between those two occurrences was a FaceTime call, placed by a bouncing phone, to the number of a man I didn't even truly look at. A man who had now seen more of my body than

anyone had since my Tinder days, over a year ago. Three declined calls later, I limped out the door to get myself to the ER before starting my hectic day. The ER was packed, but when I saw Nurse Bridget, one of my students' mothers, I pleaded my case and she hurried me into an examination room. An hour later, I left on crutches with a bruised ass, a fractured ankle, and an appointment to see an orthopedic surgeon at four p.m. Arriving fifteen minutes late for that appointment, I heard the sexy yet very brash accent of a man who clearly had an obsession with punctuality and, apparently, no bedside manner. Dr. Ethan Stewart, tall, copper-haired, sinfully sexy ? was a total ass. After a tongue-lashing about how irresponsible I was to, first, leave the ER with such an injury, and second, be late, I put him in his place ? or so I thought. Turned off by his arrogant attitude, turned on by the roguish glint in his green eyes and the way he spoke, I left his office a hot ? and wet mess. Upon exiting, my phone rang again. It was the same number from before, and I couldn't help answering to give the caller a piece of my mind. Once in my car, I hung up, tossed my phone on the passenger seat, and then looked out the window to see him with his phone to his ear and a grin spread across his far too handsome face. It couldn't be ? Could it?
