This volume examines the specific effects that schools have on the performance of immigrant students and linguistic minority groups. Especially in the European context this study fills a gap in examining the effects that schools have on these students' performance and performance differentiation, taking into account school related factors such as resources and teachers, and the influence of other variables like mother tongue and socioeconomic status. This report on an ongoing research project in Portugal examines state schools within the same district, in the same tests over the same assessment period. The study is based on the following set of relationships: between schools that administer proficiency tests to their non-native students; schools that do not

use such tests; and schools with verifiable support programs (including physical and digital materials); and between the effect of the school and the predictive values of the nationality, mother tongue and socioeconomic status variables on the performance of non-native students of Portuguese. English Language Teaching (ELT), especially English as a Second Language (ESL) and English as a Foreign Language (EFL), has been witnessing unprecedented changes in curriculum, teaching methodology, and the application of learning theories. This has created a demand for teachers who can teach English to learners of varied cultural, socio-economic and psychological backgrounds. The book, in its second edition, continues to discuss the modern trends, innovations, as well as the difficulties and challenges in teaching and learning ESL in a non-native context. The book, with contributions from many experts (each one specializing in a particular field) from countries such as UK, USA, Australia, New Zealand, India, Nigeria, Sri Lanka, China, and Japan, provides new methods, strategies and application-oriented solutions to overcome the problems in a practical way. The book deals with all topics pertinent to English as a Second Language or English for the non-native speakers, and these are further reinforced by a large number of examples and quotations from different sources. The new edition comes along with thoroughly improvised chapters on Narrative Inquiry for Teacher Development (Chapter 13) and Mass Media, Language Attitudes and Language Interaction Phenomena (Chapter 23): to provide an insight on the innovative approaches in Teacher training and in classrooms, and new approaches and changing language dimensions in the world of media, and in general. What distinguishes the text is its focus on modern innovations and use of technology in ELT/CLT (Communicative Language Teaching). Postgraduate Students of English, teachers, teacher-trainees (B.Ed./M.A. Education/M.Ed.), and teacher-educators who are concerned with teaching English as a Second Language (ESL) should find this book immensely helpful.

Cantonese is a language from southern China that is spoken by roughly 70 million people worldwide. It is the language of Hong Kong cinema and has traditionally been the most prominent language spoken in Chinatowns around the world. People choose to learn Cantonese for a variety of social and economic reasons: because it is a heritage language that one's relatives speak; because it is the language of one's partner and monolingual in-laws; because it is necessary for living and working in Hong Kong, Macau, Guangzhou, or other Cantonese-speaking communities; because it is the bridge to fully appreciating and understanding Cantonese culture; or simply because it is an irresistible challenge. Whatever the motivation, more and more people are choosing to learn Cantonese as an additional language. This book discusses many issues related to both acquiring and teaching Cantonese. If you are a learner of Cantonese, this long overdue volume is essential to understanding both the grammatical and the social issues involved with learning this notoriously difficult language. If you are a teacher, this book will be invaluable to gaining insight into your students' motivations and needs. And finally, if you are an applied linguist, the unique aspects related to the acquisition of Cantonese offer a fascinating contribution to the literature. Grounded in analysis of Chinese and international educational concepts and classroom techniques currently used to teach Chinese as a Second Language, and a thorough review of recent research in the field, this volume identifies the learning challenges of the language for native English speakers. Orton and Scrimgeour assess the gap in knowledge and skills between learners' initial and future proficiency levels as L2

Chinese speakers, map their needs as learners towards achieving a high language proficiency, and set out an informed, integrated teaching orientation and practice for the Chinese classroom that responds to those needs. Chapters in the volume address curriculum design, teaching diverse learners and levels, the learning challenges of Chinese oral and literacy skills, grammar and vocabulary, discourse development, cultural understanding, and the affordances of a visit to China. Filled with original and engaging teaching and learning tools and techniques, this book is an essential and rich content resource for primary and secondary teachers, and teacher candidates and educators in Chinese as a Second Language education. This collection brings together a series of empirical studies on topics surrounding classrooms of Chinese as a second language (L2) by drawing on a range of theoretical frameworks, methodological strategies, and pedagogical perspectives. Over the past two decades, research on classroom-based second language acquisition (SLA) has emerged and expanded as one of the most important sub-domains in the general field of SLA. In Chinese SLA, however, scarce attention has been devoted to this line of research. With chapters written by scholars in the field of SLA—many of whom are experienced in classroom teaching, teacher education, or program administration in Chinese as a second language—this book helps disentangle the complicated relationships among linguistic targets, pedagogical conditions, assessment tools, learner individual differences, and teacher variables that exist in the so-called "black-box" classrooms of L2 Chinese. Supports students studying for Cambridge IGCSE® English as a Second Language (ESL). This fully updated print Coursebook is designed to support students studying for Cambridge International Examinations IGCSE® English as a Second Language syllabus (0510/0511/0991) for examination in 2019. With carefully scaffolded content, this easy to navigate coursebook has a language focus in each unit and offers new word and top tips. Each unit is themed and takes an integrated skills approach while emphasising a core skill. At the end of each chapter students can reflect and develop on what they have learnt, all to help build students' language skills and confidence in English as the course progresses. With over 200 languages being spoken throughout the United States of America, one thing is abundantly clear and that is that it is not important what language one does or does not speak, the key to being successful in America and therefore any where in the world is whether or not one speaks the language of wealth creation and economic development. With less than five percent of the population controlling over ninety percent of the wealth it is incumbent upon those of lower social economic strata to learn and implement the techniques required to gain and maintain access to capital through establishing family wealth and economic viability by pooling resources and training future generations in how wealth works and making sure that from one generation to the next there is sufficient resources upon which to build for the future and beyond. "Economics as a Second Language" does just that. Since it was first established in the 1970's the Applied Linguistics and Language Study series has become a major force in the study of practical problems in human communication and language education. Drawing extensively on empirical research and theoretical work in linguistics, sociology, psychology and education, the series explores key issues in language acquisition and language use. English as a Second Language learners are now a considerable and increasing part of the mainstream of urban schools in English-speaking countries. Beyond the learning of English, this development raises broader questions of language

as a medium of education in a multilingual, multicultural environment. Drawing on their experience as researchers and educators in Australia, Canada and England, the authors of *English as a Second Language in the Mainstream* present an up-to-date account of advances in theory and practice. Their analysis of system-wide provision however, suggests that a truly responsive educational vision is lacking: government policy is inadequate, educational practices for ESL students are either underdeveloped or poorly coordinated with practices for other students, and the rhetoric of reform fails to engage significantly with issues of teaching and resources. The authors argue towards a more comprehensive vision which can acknowledge the relation between issues concerning ESL students and issues concerning the educational system as a whole, which can coordinate reforms in ESL education with general reforms, which can explicitly and systematically integrate language learning and content learning, and which can build more positively on the multilingual and multicultural nature of modern education for all students.

It is a process that seems to take place without any obvious effort. Second language learning, particularly among adults, causes more difficulty. The purpose of this series is to compile a collection of high-quality monographs on language acquisition. The series serves the needs of everyone who wants to know more about the problem of language acquisition in general and/or about language acquisition in specific contexts. This innovative and original volume brings together studies that apply cognitive and functional linguistics to the study of the L2 acquisition of Japanese. With each article grounded on the usage-based model and/or conceptual notions such as foregrounding and subjectivity, the volume sheds light on how cognitive and functional linguistics can help us understand aspects of Japanese acquisition that have been neglected by traditionalists. David Bennun had lived in Africa his whole life. At the age of 18 he came to Britain, the mother country. The country he had read about in Punch magazine or seen in films like Chariots of Fire. He was in for a shock. A very big shock indeed: 'I could not have been less prepared had I spent my life up to that point listening to 30-year-old broadcasts of the Light Programme.' In this timely follow-up to the critically acclaimed Tick Bite Fever, David Bennun shows us our own country through the eyes of an alien. With his brilliantly witty turn of phrase we follow his life as a student, his brushes with Bohemia, his troubles renting and buying property, his discovery of British food and his horrors at entering the world of work. From DIY to architecture, sport to alcohol, transport to music and entertainment, David Bennun brilliantly and with ruthless wit deconstructs all these subjects, many of them so dear to the British heart. The texts, along with engaging illustrations and photographs, activate learners' imaginations and help create an inclusive environment, providing them with the opportunity to contribute their own knowledge and experiences to the lesson, whatever their level of English. Learners quickly gain confidence as they are challenged to think deeply, and communicate their ideas and opinions. This text aims to broaden the field of second language acquisition, focusing on Japanese rather than on more commonly studied European languages. Chapters include studies on input and interaction, research into the evaluation of proficiency, and grammatical investigations. This book is the first edited book to cover a wide range of issues related to Chinese as a second language (CSL) speech, including tone and segment acquisition and processing, categorical perception of tones, CSL fluency, CSL intelligibility/comprehensibility and accentedness, and pronunciation pedagogy. It offers an essential go-to book for anyone who is interested in CSL speech, e.g. CSL speech researchers, Chinese instructors, CSL learners, and anyone interested in second language speech.
