Two Wheels Over Catalonia Aug 24 2020 "The 6-kilometre ride from the cape to Cadaqués is a classic for enthusiasts of the wild and windy. The thin, grey thread of tarmac seems a feeble and marginal intrusion into this savage landscape of rock, cliff and scrub." Sixteen years after first moving to Catalonia, Richard Guise finally finds time to slow down and explore the back roads by bicycle. With over 400 kilometres of sparkling Mediterranean shoreline and an interior dominated by the Pyrenees, it's a spectacular journey from wind-blown headlands to the glitzy costas, and from bustling Barcelona to remote hillsides where only grazing goats and chirruping cicadas disturb the tranquillity. Dipping into the unique history of this fiercely independent nation-within-a-

nation, he uncovers many of its cultural peculiarities, such as why the sardana dance is not as easy as it looks and what to do in a bugaderia. Stumbling upon nudist beaches, ancient Iberian sites and revolutionary road-sweepers, this slow cyclist revels in authentic Catalonia.

*Compact Utility Tractors* Jun 21 2020 Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel versions. Today's compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.
