In *Philosophical Provocations*, Colin McGinn offers a series of short, sharp essays that take on philosophical problems ranging from the concept of mind to paradox, altruism, and the relation between God and the Devil. Avoiding the usual scholarly apparatus and embracing a blunt pithiness, McGinn aims to achieve as much as possible in as short a space as possible while covering as many topics as possible. Much academic philosophical writing today is long, leaden, citation heavy, dense with qualifications, and painful to read. The essays in *Philosophical Provocations* are short, direct, and engaging, often challenging philosophical orthodoxy as they consider issues in mind, language, knowledge, metaphysics, biology, ethics, and religion. McGinn is looking for new ways to think about old problems. Thus he writes, about consciousness, "I think we have been all wrong," and goes on to suggest that both consciousness and the unconscious are mysteries. Summing up his proposal on altruism, he remarks, "My suggestion can now be stated, somewhat brutally, as follows: human altruism is the result of parasitic manipulation." He takes a moment to reflect: "I really don't know why it is good to be alive, though I am convinced that the standard suggestions don't work." McGinn gets straight to the point and states his position with maximum clarity. These essays offer provocative invitations to think again.

Musaicum Books present to you the collected works of U. G. Krishnamurti: *The Mystique of Enlightenment* *Courage to Stand Alone* *Mind is a Myth* *No Way Out* *Thought is Your Enemy* *The Natural State*

Uppaluri Gopala Krishnamurti (1918-2007), better known as U.G., was an Indian speaker who questioned the state of enlightenment as a real thing. Instead of using the word "enlightenment", he used "calamity" and "natural state" to describe an event in his life. He claimed that the return to the natural state is a rare, a causal, biological occurrence, an event which he referred to in his own life as "the calamity". Because of this, he discouraged people from pursuing the "natural state" as a spiritual goal. He rejected the very basis of thought and in doing so negated all systems of thought and knowledge. Hence he explained his assertions were experiential and not speculative – "Tell them that there is nothing to

understand." "Includes 1,200+ Practice Questions"--Cover. Connect students in grades 4 and up with science using Jumpstarters for Science: Short Daily Warm-Ups for the Classroom.
