advise you to follow the new harmonized cable colour coding as specified in BS 7671. The fire alarm fire carbon monoxide safety device is in working order as the 9 volt battery is replaced and the SA 195 is mounted against the ceiling. When the battery is replaced, the unit on the ceiling plate can be tested. The LED under the test button will now flash every 45 seconds when the alarm is triggered in the smoke or fire alarm user instructions AS 3786:2014. Emerald Planet 9V Emerald Alarm EP Rang 1 10yr Emerald Alarm EP Rang RF 10 240V Emerald Alarm EP VC 240 1 Emerald Alarm Controller EP SA CON RF Home Guard PSA 10yr. The model number is located on the back label on your alarm. To find it, you will need to remove your alarm from the ceiling or wall. Most alarms are attached to a mounting plate and can be removed by turning the alarm counterclockwise. See the alarm removal instructions for details. The number will be labeled: Model, Sensor Type, Optical, Supply Voltage, 230V AC, 50Hz, Battery Back Up, 9V Alkaline, Replaceable, Sound Level, 85dB(A) at 3m, Operating Temperature, 0°C to 40°C, Humidity Range, 15 to 95% Relative Humidity. Button Test simulates the effect of smoke and checks chamber electronics and horn self test. Smoke chamber is automatically tested. Web Manual Fire Alarm Activation. Fire Alarm Pull Station. A fire alarm pull station is an active fire protection device usually wall mounted. Manual call points exist in Europe, Australia, New Zealand, and Asia. Pull

stations are generally not used instead of temporary mcps
